

GENESIS  
GLOBAL SCHOOL

# THE BUGLE

## JUNIOR SCHOOL ANNUAL DAY

On Saturday 29<sup>th</sup> November 2014, the primary wing of Genesis Global School celebrated its Annual Day. It was a grand affair, with 100% participation of all students from Classes 2 to 5. The function was graced with the presence of Dr Bhure Lal, Chairman of the school as the guest of honour. The Principal, Mr Pramod Sharma, delivered a speech to welcome the guests and open the proceedings.

The show began with the students from MBCN performing a beautiful movement piece to a Prayer Song. The students performed with great enthusiasm and were received very well by the audience who were overwhelmed by their soulful rendition and could be seen wiping their tears. The ability to be thankful for all that we have in life is something that these children exemplify. MBCN is a sister concern of Genesis Global School and works to educate and equip special children to live within the community.

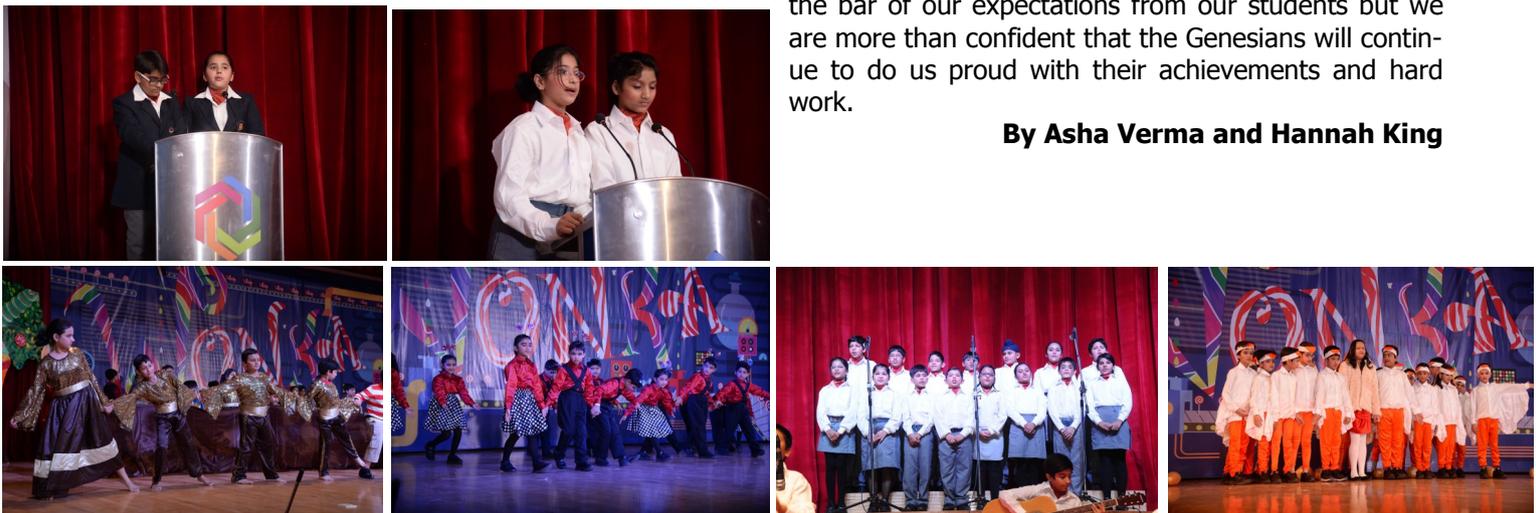

Next was a Rock and Roll musical performance by the students of Classes 4 and 5. It was a foot tapping and uplifting medley of songs. The melody brought excitement and joy to the atmosphere.

The students of Class 5, with mutual consensus decided on the story Charlie and The Chocolate Factory by Roald Dahl for their play performance this year. Each Class performed a dance routine relating to the story, and wore elaborate costumes and makeup to bring vibrance, colour and energy to the performance. Their efforts paid dividends as their show was greatly applauded and appreciated by the family and friends who came along to watch.

Through seemingly innocuous story 'Charlie and The Chocolate Factory', the students learnt values and morals. The subtle but clear motif throughout the play was teaching children patience, self-control, reflection, consequences for actions, perseverance and graciousness. This year, the School's Annual Report and Sports Report were eloquently shared by the Head of Junior School Mrs Neeti Bhalla Saini along with our young learners. The show ended on a high note with the Grand Finale, wherein all participants came to the stage to proudly take a bow. Various departments in the School came forward to do more than their bit to ensure smooth management of the show.

Genesis Global Schools' Annual Day for 2014 was a great success, and was enjoyed by all. This show has raised the bar of our expectations from our students but we are more than confident that the Genesians will continue to do us proud with their achievements and hard work.

## ***A LITTLE GIRL'S BIRTHDAY WITH HER BROTHER***

Once upon a time, there lived a boy and a girl in a little house in the woods. One day they were going to the garden to play. They were playing with a pink and blue ball. The girl's name was Shaiya and the boy's was Sean.

After playing for some time, they went back home. It was Shaiya's birthday. All her friends were invited to her birthday party and they all came, they played together. They watched a puppet show while sipping cold juice. There was a magic show too. The magician performed lots of magic. The children were enjoying the party. They ate some hot yummy snacks. After the show, they sang the Birthday song and ate lots of strawberry, blueberry cake which was arranged in layers.

All the children danced on the music and they played some games. They brought beautiful gifts for Shaiya which she loved and she also gave lovely gifts to her friends. All the friends returned home. Shaiya played with her brother Sean and shared her gifts with him. One of her friends gifted a 'Jewel Art' set and Shaiya with her brother made a necklace for her mother and a bracelet too. They played for a while and then they brushed their teeth, they changed their clothes, wore their night suits and their mother told them a story. The story's name was 'Dick Whittington'. After listening to the story they all went to sleep.

## ***'Show and Tell' for our Early learners***

For years, early childhood teachers have implemented show-and-tell as a natural extension of all early language experiences. It is a learning engagement that can be socially rewarding and academically advantageous for young children while also strengthening the home-school connection. In this a child brings an object, pictures or any other thing required by the Class teacher and shares his views about it with his peers.

In order to capitalize on the many benefits of 'Show and Tell', teachers in Genesis Global School take into account the age and developmental level of the children in their class. This helps them to plan for children's limited attention span, build speaking skills, increase confidence in speaking, and minimize competition.

'Show and Tell' is designed to provide children with a forum for speaking publicly. Therefore, every effort is made to help them feel successful as they present their views to an audience of their classmates .

'Show and Tell' isn't just about giving the child a reason to bringing things to class; each child's social, emotional and language skills are made to grow. They develop from this activity the use of descriptive language, practise listening skills and share their special items with others. Sharing prized possessions with peers makes for a fun and comfortable learning arena for everyone involved.

Some benefits of 'Show and Tell' practice in Genesis include building of -

### **✪ Self-Esteem and Pride**

'Show and Tell' time in our school gives children a chance to be the centre of attention for a bit as they explain the significance of the item they bring and while other children show interest and ask questions about that loved object. This positive social interaction can really boost a child's self-esteem and make them feel good about themselves.

### **✪ Oral Skills**

'Show and Tell' in the classroom helps strengthen the child's oral skills and helps foster public speaking skills .Children feel comfortable while talking to a group of peers.

### **✪ Social Skills**

Because 'Show and Tell' is a group activity, it helps teach children appropriate social skills. Each child is encouraged to be patient, take turns, use kind words. Also, 'Show and Tell' opens up doors to make new friends. Once a learner has gone through his/her 'Show and Tell', other children want to talk to him/her about it.

**Tanya Ghai, Mentor**

The learners of Class 4 spoke in a unique manner about the adaptations made by different animals— through poems!! Here is a sample of their creativity—

### Rabbit

I saw a hopping rabbit,  
While I was holding my tablet!!  
It was nibbling a carrot,  
When I was munching a chocolate!!

I tried to click some photos,  
With its white furry coat!!  
But it hopped out before I clicked some photos!!

I went out to feel its long whiskers,  
I couldn't see anything but its tall ears!!  
It keeps him cool every year!!

I gave it a carrot,  
And I left my chocolate!!

It nibbled at it.  
Then I made a picture of it!!  
We played many games,  
And finally he hopped away!!

**Kushi Arun Kumar, IV-B**

### Camel

Camels are ships of desert  
It sails on its legs  
Moving to and fro  
The eyelashes are so big  
Like a wig  
They have such long ears  
That they can hear a song from bears  
We need a pump  
To wash its hump  
When sand storm begins  
It closes its nose

**Ansh Jain, IV-B**

### Brilliant Feathers

God created its feathers,  
for the rainy weather.  
Peacock's have eyes on side,  
when predators come, it hides.  
It's feathers are blue, purple, green,  
Fit to be in the dress of a queen.  
It's feathers are as long as six feet,  
I can see them from my street.  
When it flies I don't see anything,  
only its extremely beautiful wing.  
The white peacock looks like the ice queen,  
WOW!!! WOW!!! WOW!!! What a scene!

**Ananya Kapoor, IV-B**

### Cheetah

It is a Cheetah,  
Fast and Swift,  
It is a Cheetah,  
That won't give you a lift,  
It is a Cheetah,  
That can smile and then run a mile,  
Cheetahs have a fear that they will disappear,  
The Cheetahs are right,  
We gave them a fright,  
We should try to save their life

**Keshav Sethi of class IV- A.**

Did you know that.....

- ✪ Bats are the only mammals that can fly.
- ✪ Ostriches can run faster than horses.
- ✪ Elephants can smell water up to 3 miles away.
- ✪ A cat has 32 muscles in each ear.

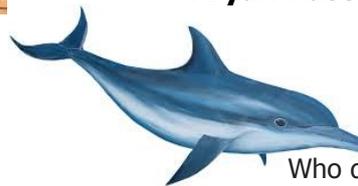

### Lucy the elephant

Great grey animal  
Roaming through Africa  
Looking for some place new

His trunk is as long  
As a slimy snake.  
And it's ready to spew

His tusks are white as milk  
And sharp as sharks teeth  
Such elephants are few!

**Aryan Rastogi, IV-B**

### Dolphins

Acrobats of the sea,  
Who dive in at the sight of me!  
Intelligent as intelligent can be,  
Why, oh why, can you not stay with me?

We are so similar, you and me-  
One big family that roughs it out together,  
Just like us - me and my family!

How do you sleep just one part of  
your brain?  
Tell me, oh tell me, how can I be  
as alert as you  
And do the same with my brain?

When winter comes, I feel so cold  
I wish I had blubber  
So that, it would get easier as I  
grow old!

My salutations, acrobats of the  
sea,  
Who dive in at the sight of me!

**—Vishisht Sachin Kataria IV B**

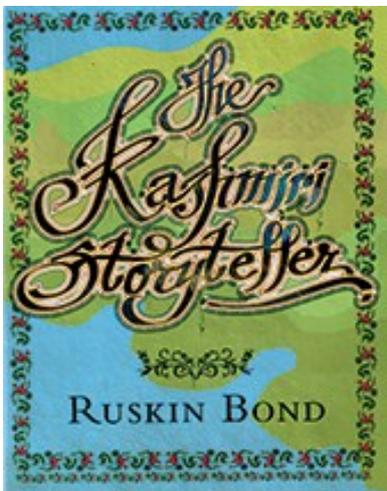

## Skype session with Ascot International Thailand

When we started the skype session , our teacher Mukti Ma'am, called up Ms. Scarlet Campbell, the teacher from Ascot International School, Thailand from her laptop. We all needed to prepare ten questions we wanted to ask , before speaking in front of the web camera. After that, all of us asked questions one by one from the Thai students and they also asked us questions about India. My whole class had lots of fun because we were doing it for the first time. I hope that the Thai children also liked it. From this session we got to know an interesting fact that our country India and Thailand have the same national flower that is Lotus. The best part of the session was, when they and us both sang the national anthem of our countries. When the skype session was over our teacher told us that the skype is an easy way to communicate with each other and be connected with our loved ones living far away.

**Arnav Goel, III C**

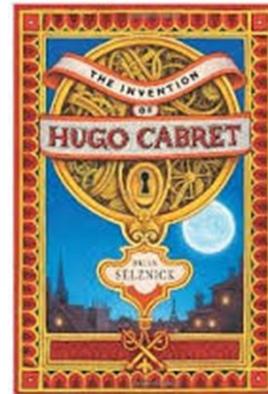

## BOOK REVIEWS

I am writing about a book called 'The Kashmiri Storyteller' by Ruskin Bond.

This is a very interesting book about a boy named Kamal. He is fond of listening to the stories of the Kashmiri man named Javed Khan. Those who are interested in Kashmiri stories can read it. The book is available in the library in the Ruskin Bond section. If you do not find it there then try to borrow it from someone or buy it. Please read this interesting book of various Kashmiri stories!

**Aditi Thakur, V C**

'THE INVENTION OF HUGO CABRET' is a wonderful mystery book. In my opinion it is the best book that I have read till now. It is available in the library. The brief story is that Hugo's father finds a mechanical man who can write and give messages. His father dies because of a fire and Hugo finds the mechanical man in the garbage and fixes it. Now Hugo has to find the message his father has saved for him.

If I could give marks to this book, I would give it a ninety out of hundred. A good book with an extensive vocabulary. It is a thick book but that doesn't mean that reading a thick book is boring , its actually awesome. Moreover, it has a lot of pictures to explain things to the readers.

I suggest you borrow it and give reading it a try.

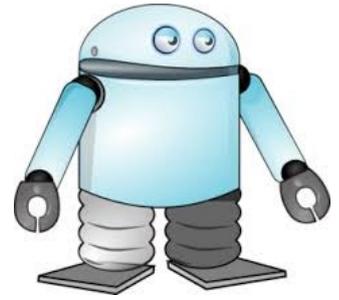

**Shlok Upadhyay, V C**

# Facts about Robots

Robots are amazing machines that can work on their own. They can go into many places from space to deep underwater. There are various kinds of robots such as:

- ⊛ Humanoid robots- Scientists are building humanoid robots that can carry out a wide range of skills.
- ⊛ Robot explorers- This kind of robots can take pictures, go to different dangerous places where normal people cannot visit and find out useful information without putting people at risk.
- ⊛ Rescue robots- Robots can save lives by fighting fires, searching for survivors, after disasters and handling dangerous objects such as unexploded bombs.
- ⊛ Robot doctors- Robots are ideal assistants for human surgeons in hospital operations and can work for hours without getting tired.
- ⊛ Robots at home- The latest robots are doing useful jobs around the house.

These days robots are an important part of our life and I love them too.

## The Lion and The Mouse

Once upon a time, there was a lion .There was a mouse too. One day the mouse was sleeping in his house and the lion was standing on a big mountain. He jumped down from the mountain and woke the mouse. The mouse got angry and went to the lion and said, "O lion, don't jump the way you jumped right now, Ok?". The lion said, "No Mr. Mouse, I will continue to jump just like this ".

At 6 o' clock all the animals went for a jungle party. In the party the mouse drank cold drinks and ate snacks. He enjoyed the snacks . The lion was also there and both the lion and the mouse became good friends.

## The Book thief

Last month I went to Jaipur with my parents. Something very funny happened on that trip. My parents knew that I am very fond of reading books so they always want me not to carry books while travelling. The day before we had to go, my mother asked me to pack my things. I secretly kept my book along with my things. In the car when my parents were busy talking I started reading my book. My mother kept thinking that i was sleeping. In between I asked them the meaning of some difficult words, my mother turned back and was very surprised to see me reading a book. She asked me from where I had got the book and I told her the entire story.

She asked me to keep it aside and take some rest but i didn't listen to her and finished the entire book. Finally when we reached the Jaipur I had a bad headache and then I realised that I should have obeyed my parents

**Nimay Gupta, II-D**

## MY FAVOURITE SOURCE OF LIGHT

I use a lantern to see something in the darkroom of my house. People hang lanterns outside their houses. It is my favourite source of light.

The sun gives light to the moon and the moon gives light to us. The sun is my favourite source of light.

**Jaiveer Baweja, I-A**

**Shiv Dev Mittal, I-A**

## मेरा सपना

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा ।

जब नन्हा सूरज निकलेगा,  
हर बच्चा स्कूल को दौड़ेगा ।  
हर घर में विद्युत भागेगी,  
न कोई अनपढ़ बुत होगा ॥

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा।

लड़का-लड़की में भेद नहीं,  
हिन्दू-मुस्लिम मतभेद नहीं।  
भूखा कोई भी पेट नहीं,  
निर्धन के ऊपर सेठ नहीं॥

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा।

हाथों में रोजी का साधन,  
पुलकित होगा हर इक तन-मन ।  
नित नई बुलंदी छूने को,  
कस कमर खड़ा होगा जन-जन ॥

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा।

कल-कल करती नदियाँ होंगी,  
जिन में निर्मल जल होगा।  
मानव को मानव चाहेगा,  
ऐसा ही अपना कल होगा॥

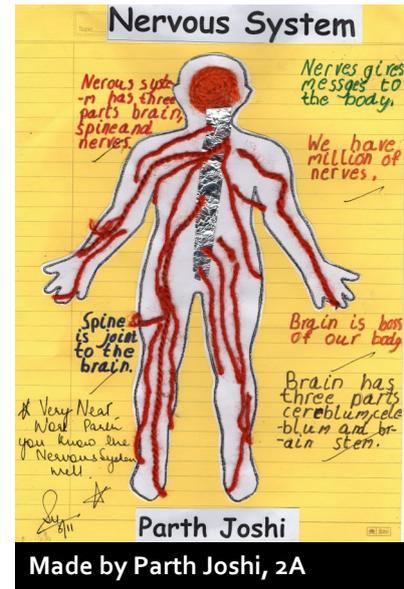

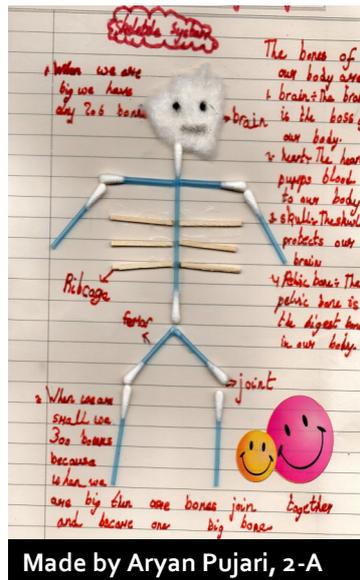

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा।

मानचित्र पर विश्व के अपने,  
भारत अक्वल आएगा,  
विकसित होगा कोना-कोना,  
फिर सोने की चिड़िया कहलाएगा ॥

मैंने एक सपना देखा है  
जो सच होगा, सचमुच होगा।

भरत तिवारी, IV अ

# Body Systems

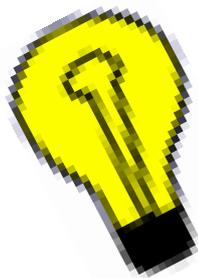

We at Genesis Global School believe in the famous quote by Edward De Bono: 'Creativity involves breaking out of established patterns in an order to look at things in a different way'. Keeping this in mind Grade 2 used their imagination to the optimum to create body systems differently as they are learning about the functions of various body systems.

The young learners used wool and silver foil to create NERVOUS SYSTEM and reflected their understanding of the same. They wrote the journey of food, starting from the mouth till it turns into waste food and is expelled from the body, amply displaying their understanding of the DIGESTIVE SYSTEM. Earbuds and matchsticks were used in an artistic way to represent the SKELETAL SYSTEM. The pictures say it all!!

Sangeeta Kapoor, Mentor II-A

## Oh Dear Light!

Light, light, light you are our life  
You make us bright with the way you shine

You make us see beautiful things in our life  
Without you we cannot do a single thing right

Oh! Dear light..... we thank you  
from the bottom of our heart  
for being there for all of us through day and night .

Scholars of class I- B

# Learner's day out

Having breakfast in the garden

Children loved playing 'Feed the Mouse' out in the garden.

A hands on learning engagement for numbers

It was fun drawing and painting in the open air.

Jumping and running in fresh air!

## Young Round Square Conference (3<sup>rd</sup> to 7<sup>th</sup> November 2014)

Our trip to Hisar was adventurous, interactive and full of fun. It was an absolutely fantastic stay at Vidya Devi Jindal School. Vidya Devi is a Round Square School. I thought that my school Genesis was really big but this one was gigantic. It was a school in which I can assure you that you would lose your way, at least once.

We had special assemblies in which we had conversations with keynote speakers. These were people who knew a lot about this year's round square topic "Enrich, Elevate, Empower". We even had Barazza sessions in which we interacted with students from other schools. These sessions also had many interesting activities like pottery, stone painting and art and craft.

We stayed in the staff residence of the school for five days. I thought I would get bored, however the DJ nights and the company of old and new friends made it a stay worth cherishing. It was a great trip and I hope I get to participate in Round Square every year.

# To Light!

**Arjun Shankar Makar, V A**

Dear light ,  
without you I can not do my studies. You are very important and useful for me. Thank you so much for helping me. One day I will also help you .

I make use of sunlight to play outside. I use sunlight to read books. I use sunlight to go to school. The sun is my favourite source of light.

A bulb is used for so many things. I use it when I go to my room. I use it's light to eat and play. Bulb is my favourite source of light.

**Mansi Vaishishth, I—A**

**Noshi Batwal I—A**

# An Experience of lifetime @ Ruhi Foundation

We went to Ruhi Foundation for a social visit. We met our new friends who are not as privileged as us. We went there and made a wish tree in which we took some paper and wrote our own wish. We noticed that they all wished for their needs but we just wrote massive wants.

Then after some days they visited our school we, as hosts involved them in all the activities we did. We taught them homophones using an interesting learning engagement. We even involved them in some physical activities like shuttle run . We want them to come to our school regularly and learn and enjoy with us.

Vidit Mahajan, V A

## Thank you light!

Thank you light for giving us your light. Without you I can not do anything . I can read and see things because of you.

Thank you for giving your light to us.....

Love-Seolhui, 1-C

Thank you dear light for your help. I am able to read and see because of you. I can do everything with your help.

Thank you for helping me.....

Love– Naman, 1-C

Dear light,  
I cannot see anything without you. Light because of you I am able to read and do my work. With your help I can do everything . Thank you for everything you have done for me.

Love– Aneysa, 1-C

## Mom's Birthday

It was a sunny Sunday. It was Elsa's birthday. She liked plants very much. She had two children Anna and Sam. Elsa was a very nice lady. She took good care of her family, her children and her husband. She liked plants very much. The children thought they would give Elsa a few plants as her birthday gift. In the evening they surprised her by giving her the gift. She was very happy and said "I will never forget this birthday ever".

## A Grandfather writes.....

Dear Shri Sharma,

I am writing this letter to you to express my sincere feelings of appreciation for your staff and your school, Genesis Global School. My two grandsons, Abhiraj Bains and Gunraj Bains, students of class 3C and 1C respectively are studying in your school. On various occasions like grandparents day or any other school functions, I make it a point to attend if permitted. This gives me an opportunity to see infrastructure of the school and various curriculums where children participate. I always talk to the teachers and see their approach for the development of the personality of the children over and above the class environments of the school and very well managed facilities, teachers put in lots of efforts to coordinate and harness the children's energy while performing for items they present. Individual attention to the children by the teachers is praise worthy. To control and coordinate such small wards requires extra efforts by teachers which is there. Teachers are cooperative and communicative with parents and grandparents. I wish you, the teachers and staff grand success.

With best wishes and warm regards

Yours truly,  
Major P.S. Bains (retd)
