Inquiry in kindergarten

The early learners of Kindergarten undertook an inquiry on 'Material' under the theme 'How the world works' with the central idea- 'Understanding the way materials behave and interact determines how people use them'. Our early learners explored 'Wood' as a material. They reconnoitered and identified all the objects made of wood in their surroundings. They sorted and investigated objects made of wood. Early Learners inquired into the origin of wood, objects made out of wood and its properties and usage. To enhance their learning and make it more transdisciplinary in nature, learners visited the music room wherein they explored different musical instruments made up of wood. To heighten their learning, the learners were given a few pieces of wood to create articles. They came up with wonderful pieces like boats, cupboards, flutes, violins etc. They let loose their imagination and had fun all the way!

A VISIT TO THE RUHI FOUNDATION

We the children of Class three have taken a pledge to help the children of Ruhi Foundation (a school for the underprivileged), so that they can learn more things; therefore we visited the Ruhi Foundation School on 4th August, 2015. We went there by the school bus. We were welcomed and taken to a hall where there were carpets. After we entered around twenty five students of Ruhi Foundation joined us. We introduced each other and were given a buddy each. We did an activity with them in which we had to see a picture and make sentences using it. My partner's name was Manisha. We asked the children many questions to know them better. Along with them, we found meaning of some words from the dictionary. In the end Ambika ma'am did an activity with them which was very interesting. There was a difference between what she spoke and the action which she showed. The students had to follow her actions and not what she said and say the name of the action. We all had a great time and promised to return there every month. When I came back home and shared by experience with my mother and father, my mother also wanted to come with me there next time. I really enjoyed my trip.

If I were the Prime Minister of India

If I were the prime minister of India, I would ensure that my country participated in all contests, games, conferences etc. of the world. I would also ensure that it was at par with international levels in everything. I would always keep my country clean and encourage everyone to use CNG or eco-friendly vehicles, so that my country was free of pollution. Things in the market would be cheap and of best quality. Each office would be encouraged to give poor people an opportunity to get a job. In my country, everyone would be treated equally. I would stop child labour and if, I saw someone doing human trafficking then I would punish him by keeping him in jail for a lifetime. From all the income tax received, I would bring new and eco-friendly technology. The police and the army would be given a special training to fight with thieves, terrorists, enemies and people who do bad work. This way my people and my country would be safe. I would make my country the biggest economy in the world. It would be in the Guinness book of world records for being a totally pollution free country. My country would be the best in whole universe.

Learning Mapping Skills

It was a real delight to see the learners of Grade 2 learn mapping skills at the young age of seven. They located and marked the seven continents and five oceans in the outline of the world map as a part of the Unit 'Where We Are In Place And Time' with the central idea - All places on Earth have special features that distinguish them from other places. The learners could also make trans-disciplinary connections with the concept of 'Directions' in Math.

They could understand well, the location of various continents and oceans as per the four cardinal directions- North, South, East and West. Learners could also locate India on the map and pointed out Delhi in it. Overall it was a fun filled and an enriching learning engagement which was enjoyed by all.

The most amazing adventure

As I dug into the flowerbed.....I hit something hard. What was it? I wondered.....and on checking, I was surprised to see a metallic bottle. Curious to see what the bottle contained, I unscrewed it and found some papers. On reading those papers, the most amazing story was unravelled. The story went like this.....

There were two brothers, Gink and Loop. They were kind, sweet, well-behaved and extremely curious. They lived with their parents in a beautiful house that overlooked a big garden. Behind their house lived a crazy scientist – Doofinmercks. He was working on an extremely evil project, The Derminator.

The Derminator was such a dangerous device that it could change anything, including the entire Earth into anything that Doofinmercks wanted. He was almost done with designing and creating the Derminator when, Doofinmercks thought of adding a few more deadly chips to make the end result more destructive!

After adding those chips, Doofinmercks loaded his Derminator into his chopper and headed off to a nearby forest to try out its effects. On his way, he got caught in a bad thunderstorm. With all the sudden movements, the latch of the chopper opened and.....out fell the Derminator, chips and all.

It so happened that Gink and Loop were around the site of the Derminator's fall. In fact, the Derminator missed Loop by only a fraction of inches while Gink had a shower of chips and rain.

Gink and Loop started picking up all the mess and were shocked at the ensign of the Derminator . Curious as they were, they hauled all the stuff to the science lab in their school. Slowly and steadily, they started putting everything together and in the process, chanced upon Doofinmercks's logo. They were certain now that the result of this gadget would not be the best. Yet, they wanted to know what it could do.

They decided to go to Doofinmercks's lab and find out more about this strange machine. When they got to the lab, they found that the door was ajar, so they let themselves in and started snooping around. They saw a Bluetooth that was left turned on and decided to follow its tracker. On their way, Loop accidentally pressed one of the many buttons on the aching. And.....Oh My Gracious God.....everything changed in an instant. There was nothing around them.....not even daylight. They felt as if they were in air, then on water, then again in air and.....suddenly.....they dropped on something real hard that felt like a stone. Their bodies felt numb. Yet, Gink managed to put his hand into his pocket and pulled out a tiny torch. He tried turning it on, but, there was no light. Loop was in tears. He felt sorry about his stupidity, butit was too late.

Loop tried to stand up, but his legs felt so heavy that he could not move them. They tried to shout, but, no noise came out! Both the brothers were scared and helpless.

Loop was still holding onto the machine. He tried to shake off the machine from his hands and again ended up pressing lots and lots of buttons. In an instant, they started spinning and spinning and.....spinning. After spinning for what felt like forever, they landed with a thud. They opened their eyes and saw that.....they.....had.....come.....home. Home back from Mystery land!! Even the dangerous machine was crushed beyond repair!

WHAT AN AMAZING STORY!!

If I had not dug the flowerbed and hit upon the bottle, I wouldn't have read this wonderful story!!

MY DREAM CAME TRUE AT KINGDOM OF DREAMS

I went to the ' Kingdom of Dreams' with my mother and sister. It is an entertainment spot . Here we watched the spectacular Bollywood musical 'ZANGOORA'. It is the story of a Gypsy King. The show had lots of digital effects and aerial acts. It was a feast for the eyes. After the show we went to the 'Culture Gully'; here there were stalls from different states serving traditional food and selling hand-crafts. It was a lot of fun. Suddenly, I heard a strange sound from behind me. When I turned, I saw myself looking at a tall 'Langoor'. I got scared. It was only when he extended his hand that I realized that it was a man disguised as a Langoor! I loved every bit of the visit and really wish to go back someday again.

A Visit To A Forest

One day I went to a forest and I saw a lot of green trees. There were lots of plants and bushes. In the forest I saw many broken and cut trees. We should not cut trees because trees help us in many ways. Trees give wood for making paper, pencil, table and chair. They also give us oxygen to breathe, food to eat, medicines to get well and rubber to erase. Trees are home to animals and birds. I saw many animals like rabbit, red panda, rattlesnake, deer, jackals and lion. I saw birds like owl, duck, red and multi- coloured parrot, peacock and pigeon. We should save our forest and use mobile phones sparingly to save animals and birds.

Class assembly on transport

Class 1A and 1C had their class assembly on 27th August'15 on the topic of 'Road Safety for self and others'. It was linked to our unit on 'Transport' under the theme How we organize ourselves with the central idea- 'Communities create transportation systems that meet their needs'. The learners started the assembly with the recitation of a prayer in English and singing of the Hindi prayer. This was followed by a skit on the importance of the traffic rules while driving on the road. The learners then sang a meticulous number on how we should cross the road. The parents also witnessed a dance depicting the rules of the road. Last but not the least, the grand finale showcased all the learners taking turns and presenting various road signs and road rules. The learners thanked the parents for cheering them. The importance of road safety in today's day and age was summed up beautifully by Principal sir.

BOOK REVIEW

I read a book 'Meerkat Mail', during my summer vacations and liked it immensely. This is an entertaining and humorous story written by Emily Gravett. Its illustrations are superb and unique. I am sharing its review with all.

Sunny the Meerkat lives with his enormous family in the Kalahari Desert. It is very dry and very hot. Sometimes Sunny thinks it's too hot! Sunny's family does everything together. They are all very close . . . 'so' close, in fact, that one day Sunny decides he's had enough and packs his bags! He's off to visit his mongoose cousins around the world. He sends postcards home to his family, very informative ones indeed! In the beginning they are full of enthusiasm, but as the trip goes on and he has to stay with a families who stay up all night, to those who live in swamps, to those who eat eggs off farms he realizes that this is not a perfect place for him. He decides that maybe his own family is just right for him! After a tiring and disgusting week he is back home.

There are a lot of good aspects in this book: the fun illustrations, the great 'realistic' postcards, the information gathered from reading the descriptions from the postcards, the cute 'postmarks' and the sweet ending.

I thought that he is a courageous Meerkat as he decides to explore different places all by himself, he is also a knowledgeable Meerkat as he writes his post cards and has a very caring family. The family motto is, 'Stay safe, Stay together' and they follow it too.

This was a fun book about an endearing little animal and I enjoyed reading it

LET'S SHARE

One fine morning in a house near the beach, the doorbell rang. The lady helper opened the door to answer the doorbell. Standing there was the postman with one big parcel in his hands. The lady helper called the owner of the house whose name was Sara, to receive the parcel from postman. The parcel was from Sara's mother who had sent lots of chocolates for Sara's children. On seeing the chocolates, the children were very happy and they immediately started eating and enjoying the chocolates. But then they saw the house helper and realised that she also had two small children and there was no one who sent them chocolates like Sara's mother. The children thought that the helper's children would also like to eat chocolates because all children loved to eat chocolates. They decided to send half portion of the chocolates with the helper for her children. The helper became very happy and said thank you to the children for their good deed. Sara was also happy and loved the children for their action and thought. She felt proud of her children.

Moral - We should always share things with those who cannot afford them because it gives them happiness and makes us happy too!

MY REFLECTION ON COMPERING THE PATRIOTIC SONG COMPETITION.

One fine day my teacher Ms.Asha Verma, told the entire class to prepare a short talk on any topic of our choice. Little did I know that this was for auditioning for 'LANDMARK' (an inter-school competition). Anyway I prepared a short talk and presented the same before the teachers the next day. I was happy to learn that I had been short listed for compering the PATRIOTIC SONG competition. My friend Mahatwa was also selected for same. The teachers gave us a script to rehearse. We were informed of our lines. Thereafter, started the gruelling process of mastering and perfecting the script. I was very excited and enthusiastic and practised everyday. Our teachers made us work very hard and made sure that our pronunciation, diction and body language were appropriate. Finally the day of the competition arrived. I was very nervous initially but slowly and steadily I became more confident. I was able to conduct the whole programme with my friend Mahatwa, without any mistakes. I was thrilled! It was a very inspiring moment for me as I was able to overcome my fear and nervousness of public speaking. Today, I am confident that I can take up many more challenges like this with ease.

Life without transport

If there will be no transport then I will keep a leopard as a pet and train him to become a good animal. I will become his best friend and he will take me from one place to another on his back.

Health Tips

It is rightly said, 'Health is Wealth. If wealth is gone nothing is gone but if the health is gone everything is gone'.

To maintain good health we should abide by the following rules:

- Rule 1:** Always keep your body fit by doing yoga or physical exercises.
- Rule 2:** Always eat healthy food like green vegetables, fruits and salads. Eat less of fast foods .No aerated drinks!
- Rule 3:** Keep your surroundings clean.
- Rule 4:** Stay in pollution free and green environment.
- Rule 5:** Always keep Smiling.

The day I was flying

It was a rainy Monday morning. I got up feeling strange and light. I looked down but I couldn't see the floor. To my astonishment I was flying! My bed was in one corner on the right and I was in the other corner on the left. At first I was scared. I couldn't walk, I tried to sway through the air and what did I see? My mother, brother, father and dog were all flying. I went to my mother because I am very close to her. I asked her, "why are all of us flying?" She answered, that according to the news channels there was no gravity! That was a scary, fun, weird and strange. I got ready and went to school. All my friends were flying and people who were inside cars and trucks came out and enjoyed flying. When I reached school, I saw my teacher struggling while writing because the blackboard was flying, my music teacher was struggling to play instruments. My friends were running but this time my teachers were not just angry - they were horribly angry. Every child started going back home because teachers couldn't teach them. When the school was off I lay down in the air and the breeze pushed me home. Slowly it got dark. My mother was not able to work so she slept early. Next day, I woke up to discover that the gravity was still gone. It was fun initially but later flying and eating breakfast became boring. I started to draw but again it was not enjoyable because I needed to run here and there to get the colours. I went to my bed and slept. When I woke up I saw that I was on my bed, so I went to my mother and told her that gravity was back but her answer was " what are you talking about?" , so I told her the whole story and she said nothing like that had happened. I discovered that I was dreaming. After that dream, I hoped that God would take away gravity from the earth for just one day, it would be great fun!

A TRIP TO SPAIN

In the holidays I went on a trip to Spain. The Spanish name for Spain is Espana. Spain is a part of the European Union. The currency used in Spain is euros. I went by air and it took us twelve hours to reach there. I visited some cities in Spain which were Barcelona, Valencia, Grenada, Seville and Madrid. In Barcelona I saw the famous FC Barcelona Football Stadium. I took a cable car ride. In Valencia I took the city tour and I also went to the beach. In Grenada I went to the market, shopping mall, churches and undertook a city tour. In Seville I saw the famous Flamenco dance and music show which was performed by the best dancers and musicians of Spain who were professionals. I also saw many forts and palaces. The markets in Seville were expensive; I got to know that when I went to the market. Our last destination was Madrid. There I saw the renowned Real Madrid football stadium. I also saw the bullfight which is held in Madrid on Sundays. These are very famous in Spain but are banned in some places because of violence. Bulls and many bull- fighters are killed in bullfights. In a bullfight, if the audience thinks that the bull is good and strong, then the fighter has to leave the bull and not kill it. If in a bullfight, the bull is easily killed by the bullfighter then the organisers of the bullfight cut off the ear of that bull and give it to the bullfighter. They also give him more money than specified for winning normal bullfights. We also saw a very beautiful palace called the Royal Palace. This was indeed a very good and enjoyable trip.

Dear Rocket

Dear Rocket take us to space
To see a new and a beautiful place
Where there will be gardens full of flowers
And huge butterflies taking showers
Where we will sing and dance with our alien friends
This will set a new trend
Biscuits, toffees and cakes we will have on the way
Hip hip hurray we will have fun this way!!!

Events at a glance (July and August, 2015)

Reception – Rain Walk
Fireless cooking – Tiranga fruit salad, Coconut candies
Nursery – You Me and My Class Programme
KG - You Me and My Class Programme
Class Assembly for parents
Grade 1 - Class Assembly for parents
Guest lecture by lady pilot Ms. Mirchandani
Grade 2:-Sense Booths - learning about sense organs
Grade 3- Independence Day special assembly.
Participated in - Swimming Competition,
'Itihaas' music competition
Presentation - learners acted like machines
Scavenger Hunt for machines in school.
Inter house Cricket Match
Visit - Ruhi Foundation.
Grade 4- Working with Apna ghar
Visits -
Nehru Planetarium.
National Museum
Ruhi foundation
Grade 5-
Independence Day open quiz.
Backyard Science experiment.
Rakshabandhan celebration with MBCN.
Independence Day assembly
Initiation into the PYP Exhibition
Visit - MBCN.
Entire Junior School - Tour of 'Langmate Fiesta' and inquiry into it.

प्रकृति मनुष्य की सबसे अच्छी मित्र है। हम चाहें तो इससे बहुत कुछ सीख सकते हैं। इसकी हर चीज़ में हमारे लिए एक नया संदेश छिपा हुआ है। आइए देखें प्रकृति अपने विभिन्न रूपों में हमें कौन सा संदेश दे जाती है-

पर्वत हमें सिखाता है कि जीवन में कभी कोई गलत काम मत करो जिससे सिर झुकाना पड़े।
-ऐरेन गोयल, 3C

पृथ्वी सिखाती है कि हर स्थिति में धैर्य रखो चाहे कितनी भी मुसीबत आ जाए।
-समीर गुप्ता, 3C

आकाश हमें सिखाता है कि इतना फैल जाओ कि सबको अपना बना लो।
-वंशिका ,3C

लहरें हमें सिखाती हैं कि हमेशा खुश रहो और उत्साह से भरे रहो।
- रनवीर, 3B

सागर हमें सिखाता है कि मन में गहराई लाओ और दूसरों के दुख-दर्द को अपना बना लो।
- निमय, 3B
