The Bugle - As It Always Was!

Bowing to the pressures of popular demand, 'The Bugle' goes back to being a hard copy. We met with a lot of resistance to converting 'The Bugle' to an e magazine; the major issue being that the children would stop reading it, as it would not be accessible to them conveniently. So as I said earlier, while the debate for hard copy versus soft copy rages on, we have decided to go back to printing a hard copy of 'The Bugle' on popular demand. Please continue to read, enjoy and applaud their efforts so that each one strives to be a writer in the future!

Rainbow

Look at the rainbow,
It is so colourful.
When I look at it,
I feel so wonderful.
After the rain,
The rainbow appears.
Then I go out to play,
All throughout the day!

Let's Help Our Earth Live Forever

It's our last chance to save our earth,
Let's do it together with team work,
Our beautiful planet earth is the only place to live,
We should together put an end to the menace of destroying it.
Let's plant more trees and make it green,
So that by all it is seen.
Let's take a pledge and do what we mean,
Let's help our Earth live forever.

Samairah 3A

The Proud Rose

Once upon a time there was a rose who was very proud of her beautiful looks. Her only disappointment was that she grew next to an ugly cactus. Every day, the rose would insult the cactus on his looks while the cactus stayed quiet. All the other plants in the garden tried to make the rose see sense, but she was too proud by her own good looks.

One summer, the well in the garden dried up and there was no water for the plants. The rose began to fade. She saw a sparrow dip her beak into the cactus for some water. Though ashamed, she asked the cactus if she too could have some water. The kind cactus readily agreed and they both got through the tough summer as friends.

Moral of The Story

Never judge someone by the way they look.

Casiphia 3A

How I Caught A Perpetrator

One day my friend and I were playing in the apartment complex. Suddenly, my friend started running. She then hid herself behind a large flower pot. I asked her why she was running. She said that a man often troubles her, and that right now he was just behind us. She pointed at a housekeeping man from our own society. I saw the bad man coming towards us. We ran to the slides, but he continued to follow us. So we got into one of the tunnels in the slides to save ourselves. He could still see us and was forcing us to come down from the slides. He had a cruel smile on his face. My friend was about to get down from the slides, but I stopped her. I knew that he could kidnap us or harm us in some way. After a few minutes, the bad man disappeared.

Later, I told my mother about this incident, and she called the police. The bad man was dismissed from service. Everyone including the policeman, praised me for my bravery and for being so quick-witted.

The good touch and bad touch classes in my school helped me spot the bad man and save my friend and me from him.

Momma

Momma has a book,
because she is a cook.
Momma is an officer,
and she wants to meet a professor.
Momma likes cars,
and she eats chocolate bars.
Momma likes toffee,
and she drinks coffee.
Momma likes pineapple,
because she does not like apple.

Vedant Jain 3B

My Mom

All my inspiration comes from her.
She knows my potential for sure.
The things she knows about me,
Sometimes even I cannot see.
She inspires me to be kind,
That's how she feels the world binds.
She inspires me to have self-love,
A privilege she did not have.

Yashika Jain (guided by the parent)

3B

UDHBHAV

The ninth Annual Day was celebrated by the students of Junior School with a spectacular presentation of *Udbhav, a sojourn of igniting minds*. It was an avid depiction of the changing trends of learning, both formal and informal, encompassing all aspects of life throughout the passage of time, and in diverse parts of the globe. It all began with the portrayal of the birth of the Gurukul System of learning. The powerful weaponry dance and the dance of the intervention of the rakshas set the stage throbbing! Our young and agile dancers went on to portray the perfecting of the Kathak and Bharatnatyam dances which were patronized during the Chola period in India. Then arose the blossoming of creativity during the Great Renaissance in Europe, vividly enacted by our young learners. The nimble and petite ballerinas enthused the audience with their grace. Yet another highlight was the musical rendering of Maria Montessori's educational philosophy followed by the beautifully synchronized and energetic dance of Rani Laxmi Bai who was known to have mastered the skills required in the battle field. Finally, the performance came to a befitting conclusion with a representation of the modern-day scenario of the education structure. An insight into the igniting minds of our young learners and what the future may hold for them were lucidly captured in a fleeting moment of time, leaving the audience with a thing or two to ponder about.

Growing Minds In Genesis

I made this art work because I wanted to show that when we learn, our brains acquire knowledge and begin to grow. My brain is growing in Genesis Global School.

The tree represents the mind and Genesis represents where our minds are growing. Genesis is also growing with new children and new facilities. Our teachers are like gardeners watering trees and helping us to grow. The tree also represents the teachers who keep nurturing us.

NOTE: I love it when Alka Ma'am and Neeti Ma'am put up my canvases and other art works in their offices.

Prisha Kaur Bindra 3A

My Lovely Sister— Our Adoption Story

This is a true story based on our family. When I was a small child, I always wanted a little sister. After one year, a cute little boy was born in our family. I was very happy to play with my little brother. But I always told my parents to give me a little sister too.

One night when I was going to sleep, my mother told my brother and me that she will be bringing a little girl very soon. I was five and a half years old and my brother was only two and a half years old. I asked my mother, "How will you bring a baby?" She replied, "We are going to adopt one." I asked my mother "What is adoption?". She then told me the meaning of adoption. It is the process where families are blessed with a baby or babies born to a different mother in a far-away place. Adoption is one of the ways to have a family.

Finally after waiting for two years, we got a mail from the orphanage. They matched a cute little girl with us. They sent us lots of pictures and we had video calls with our sister too. After a week, we went to the orphanage to bring our little sister home. I was very happy, excited and emotional when I saw her for the first time. My mother signed some papers after which we took our sister home. She was also very excited to be with us and she didn't even cry once in the car. Our house helps had decorated pink and white balloons at home and we cut a welcome cake too.

We named her INARA. It means 'shining in the darkness'. She is three years old. She is a very funny and naughty girl. She loves eating and listening to songs. She speaks in Hindi and she has started understanding our Bengali language too. We three siblings love each other. Sometimes we even fight. Seven whole months have passed since she has come home and finally our family feels complete!

Zian Biswas 3D

The Garbage Cloud

Once upon a time there was a girl named Sara. She threw all the garbage everywhere, but never in the bin. One day when she woke up, she found a garbage cloud above her head. When she went to school the next day, nobody wanted to sit next to her because of the garbage cloud. This made Sara very sad. From then onwards, she decided to throw the garbage only into the trash bin.

When she woke up the next morning, the cloud above her head became smaller. Whenever she saw anyone throwing garbage on the road, she began to stop them. Finally, when she woke up one morning, she found that the cloud had completely vanished. Ever since then, Sara has been throwing garbage only into the trash bin.

Happy Summers

We experience four seasons in a year- Autumn, Summer, Monsoon and Winter. I like the summer season best of all because the weather is warm, and the days are filled with fun! We can go to the water park to play and we can wear loose and comfortable cotton clothes.

The best part of summer are the summer vacations! I can enjoy myself in the pool and I can travel to cool places which are up in the hills. Some people go to the beach for surfing, but I don't know how to surf. Maybe someday, I will learn.

Last year, I went to a pool party with my cousins and we danced a lot and even went horse riding. During the summers, we can have a variety of ice creams and most importantly, bite into delicious mangoes! In this season we should remember to drink plenty of water to avoid dehydration.

Ramya Malhotra 3D

I am

I am an artist.
 I wonder what secrets a painting can hold.
 I hear the applause for my art work.
 I see my dreams in front of me.
 I want my dreams to be in my grasp.
 I am an artist.
 I pretend to have one dream, but I have many.
 I feel very proud of the paintings I have made.
 I touch the clouds high up in the sky and I, one day, will lead the world.
 I wonder if my dreams will come true.
 I cry because I need perfect guidance.
 I understand what the environment beholds.
 I am an artist.
 I say never give up, just keep on trying.
 I dream of birds chirping while I paint in a beautiful garden.
 I try my best to be the best.
 I hope I am the best.
 I am an artist.

Riddhi Goel 4A

Doctor's Chamber

It's so boring,
 It's so tiring,
 To keep waiting, waiting, waiting,
 All day long with the pain I'm bearing.

Sitting in a row and feeling so low,
 Waiting for my doctor to bellow.
 The corridors are weary,
 And the patient's eyes are teary.

I guess that's the flu,
 That's what I'm fearing.
 Flu turns 'u' blue,
 I hate it and that's true.

Waiting, waiting and waiting for my doctor's call,
 At last, I suddenly hear my name being called,
 I jump with joy and grab my Mom,
 It's my turn - so hurry up Mom.

Muskaan Mukherjee 4B

The Titanic

Why did the titanic sink?
 this makes me think.
 A big ship like that,
 Black and grey like a bat.
 How many people were there?
 They must have got a nightmare.
 Now let's leave this topic,
 You can read a comic!

Khushi Pargaein 5B

The Colour Wheel

A colour wheel tells us about colour combinations. Red, blue and yellow are primary colours. When we mix primary colours, we get secondary colours. We mix yellow and red to get orange, blue and yellow to get green and red and blue to get purple. When we add a primary to a secondary colour, we get a third colour which is called a tertiary colour. Complementary colours are the colours which are opposite to each other in the colour wheel. Artists study the colour wheel to understand these combinations to make their paintings look attractive. I have worked on some artwork to understand these combinations.

Parthav Jindal 3E

The Jungle Safari

Once upon a time, there was a girl named Ruby who lived with her parents in Delhi. She loved animals, so one summer her parents decided to take her to a Jungle safari. During her visit to the safari, the tour guide first took them to see a pride of roaring lions. It made her very scared. Then she saw a tower of giraffes, being fed junk food by some visitors. All these people had to be stopped by the security guards. Then they saw a flamboyance of flamingos hunting for their food near a pond; it was a treat to her eyes. Nearby, a zeal of zebras were munching leaves. Ruby was thrilled and excited seeing her favourite animals as she and her family drove through the safari.

When it started to get dark and Ruby thought her great Safari experience was over. It was then that she saw a herd of elephants crossing the road in front of the jeep. Eventually, she went back to the hotel and then thanked her parents for giving her this wonderful experience and she told them that this was her best vacation ever. She realized at we should all protect these animals to maintain our ecosystem.

Yavii Aggarwal 4C

The Lost Unicorn...

There once was a Unicorn who had a little baby. Mother Unicorn had to go to war. She had to fight in the epic battle of the Unicorns versus the Dragons. Unfortunately, she died while fighting the war and left her baby unicorn all alone in the

world. One day, baby unicorn went to roam in the forest, but she got lost and could not find her way home.

After nine years, a girl called Lia and her father Mr. Johnson came to take some photographs of the forest. Suddenly Lia shouted, "Papa, look! A Unicorn! Quick, take some photographs!" Lia held some chocolates in her hand and offered it to the unicorn who came shyly to Lia and gobbled them. Her Father took photographs of both of them. Lia wanted to name the unicorn. They decided to keep her name **SPARKLE** because she sparkled like the sun.

Lia asked her father, "Can I take Sparkle home?" Her father replied, "Yes, you can." So they took her home and Lia was happy because she has found a real unicorn and she had always dreamt of having one of her own. From that day onwards, Lia and Sparkle were inseparable. Lia loved her new friend and Sparkle too reciprocated the same emotion.

Aarna Wahal 4E

If You Want, You Can Do It!

Once upon a time in Russia, there lived a poor girl called Aria. She wanted to be a famous gymnast but she could find nobody to train her. She decided to learn gymnastics all by herself. She went to the nearby park where professional gymnasts would often practice. When she returned home, she would practice what she had observed in the park. Aria would practice late into the night. She even twisted her ankle a few times, but she never gave up. After practicing for several years in this way, she finally decided to participate in a competitive event. Aria approached a gymnastics coach from a well-known institute in her home town. However, when she requested the coach for a chance to participate in the upcoming event, he simply refused to give her permission. She was disappointed, but she didn't lose hope.

Aria knew where the coach lived and also knew the place where he regularly went for his exercises, so the next morning, she visited the park where she found the coach was busily exercising. In full view of the coach, Aria started displaying her awesome floor set skills in the park. The coach was so amazed to see her talent and her passion for gymnastics that he invited her to his institute. The coach organized a mini competition for the best gymnasts of his institute and surprisingly, she outperformed every one of the trained gymnasts by a huge margin, simply due to her skills and her energy on the floor.

Aria's hard work had paid off and she finally received financial support along with high-skill training for the upcoming national and international events. Within a few years, Aria became the No.1 gymnast in the world. She was thankful to the coach for his support.

Moral: Hard work and perseverance always pays off.

Space Dream

Once upon a time there was a kid named Amit. He was a brave boy. Amit wanted to become an astronaut. He wanted to fly a rocket and explore the space. As he grew up, he worked very hard and became an astronaut. He even got himself a license to fly. He went on a mission called Apollo 13 and learned about black holes. He learned that every galaxy has a black hole at its center. The hottest planet in the solar system was almost 450 degree Celsius. He wanted to get more information, go further ahead and explore more. Suddenly he felt a tremor. He was confused as to what scientific norm this could be. The tremors became faster. And just as he was about to enter the area of the unknown, his eyes opened.

Oh no! It was all a dream!! His mother was waking him up as it was time to get ready and go to school. He smiled and looked at his mother and told her about his dream. He promised, to work hard to turn his dream to reality!

A New Beginning

A new beginning
a new start,
We have school again,
in a whole new class.
Making new friends
and having fun,
Playing together
in the bright sun.
The annual day is back,
We get to sing, dance and act.
My favourite treats are back too,
Ice-cream and mangoes are the best two.
We also get to splash in the pool,
Then we also feel really cool.
I am so excited to have this much fun,
Let us all enjoy back in the sun.

Tanmayi Monga 5B

Friendship

Friendship is like a picture of bright colours
It smells like a sweet relationship
It tastes like a yummy hot coffee
It sounds like wind chimes chiming in the air
It feels like the most softest toy I have
And lastly it lives between all my friends

Aakshi Goel 5D

Wisdom

Wisdom is the key to happiness
One should always have wisdom
Wisdom is also a great warrior
Wisdom should be our first motto
It feels like one is confident
It is a great gift God gave us
We all have wisdom, but we need to know
how to use it

Priyanshi Singhal 5C

Joy

Joy is blue
It smells like roses
It tastes like chocolate cake
It sounds like your father's steps when he is home from work
It feels soft like cotton
You will find it everywhere
So always have joy, no matter what
No matter how cold or hot
It will lead to a better path

Prarthana Mittal 5C

Indian Democracy

Amidst the Lok Sabha elections, let me put some light on our country's democracy and voting rights. Democracy is a government for the people, of the people and by the people. India is the largest democracy in the world. India became a democratic country after its constitution came into effect on 26th January, 1950. Dr. B R Ambedkar drafted our constitution which is said to be the longest constitution. According to our constitution, a person is eligible to vote if he/she is a citizen of India and has completed 18 years of age. Every citizen above 18 years has a right to vote and elect their leaders irrespective of caste, colour, creed, religion or gender. Our democracy has 5 principles - sovereign, socialist, secular, democratic and republic.

So, I request every citizen eligible must go and cast their vote whenever elections are held.

Aashini Sehgal 5D

Child Rights

We have child rights do you know
We live, laugh, love, and grow.
To be respected, is that much of an expectation
All we need is the right to self-reflection.
Freedom of speech and right to education
To become global citizens of the next generation.
Right to safety, health and proper sanitation
To live a life with freedom of expressions.
Give us our dues and give us our rights
To let us enjoy and live our life.

Yashas Rohatgi 5E

My Family Trip To Puri

I went, for a holiday with my family to a place called Puri, we visited a sunny beach, a big zoo and some beautiful temples. It was my visit to a beach. I had a lot of fun playing in the water, collecting shells and building sand castles. There was a life guard who who helped me to go right under the waves. At first I thought I would drown, but I actually found myself floating on top of a wave! I was really very thrilled playing in the water!

We visited many beautiful temples. Most of them were extremely crowded. People were pushing each other, so my grandfather carried me on his shoulders to keep me really safe.

Finally we went to the zoo. We took part in a safari and saw many animals like lions, white tigers, bears, deer, peacocks, black panthers and alligators. When a bear came very close to our bus, we were very scared. I just cannot wait for another similar trip.

Soham Jindal 2A

My Favourite Words- Empathy and Gratitude

My favourite words in the whole world are 'empathy' and 'gratitude'. Empathy is to understand other's feelings while gratitude is to always be thankful for what we have. If all the people in the world loved one another and used these two important attributes in their own lives, the world will be a beautiful place for all of us to live in.

Vihaan.R.Singh 2 A

Robotics

Friends, through this article, I am going to share my experience about Robotics.

There are many special things you can do with the NXT brick, one of them being transferring controls from the NXT programming software into the NXT brick by connecting it through a USB plug cable.

We do the programming in the Lego Mindstorms software, the programming is very easy to understand. We start with the move block to make the robot move. Then we do some settings to give it instructions like directions, forward and backward, for how much time you want the motor of the robot to move, to transfer the controls in the robot etc.

I love the part after this which is downloading the program into the robot. For that first you need to insert the USB plug into the Laptop and on the other end of the cable connect the NXT brick, then there will be a downloading icon in the software, you need to click on it and you're done. Now unplug the USB cable and search for your file name in the NXT Brick. Click it and 3,2,1, you're ready to move your robot!

Arjun Sharma 4E

Let's Make Earth Blue And Green

People are crying because our earth is not clean,
Animals are dying because it's not green.
Skies are no longer blue and clear,
How will we live with so much fear?

Snow is melting, the world will sink,
And we won't have enough water to drink.
The winter is getting colder,
The summer is getting warmer.

Let's not pollute our earth,
Come let's salute our earth.
Protect what has been given for free,
Our water, skies and our trees.

Shanaya Bhatia 2C

I Love My Earth

I love my earth,
 it's a part of me.
 Let's plant more trees,
 to live pollution free.
 Let's pledge not to use plastic,
 for everyone to live a life fantastic.
 Let's save water,
 to live a better life later.
 Oh! let's save our
 Earth,
 to make our lives
 'worth'.

Kiara Sharma 2B

Environment

There are so many environmental issues on our beautiful planet Earth like pollution, climate change and water shortage. As good citizens, it's our moral responsibility to save our planet Earth by simply taking some important steps. We should conserve electricity and natural resources. We could use solar power for a cleaner environment. We should use public transport more often and we should walk for short distances as walking is said to be extremely good for our health.

For maintaining a healthy ecosystem, segregation of waste is important. For instance, we should use different bins for wet, dry and recyclable waste. By following this process, we can recycle the waste products once again. We should also save water as water is very important for our survival. Many countries are losing their water sources which is very dangerous. We should conserve water by giving importance to rain water harvesting.

We should also plant more and more trees in our neighborhood to keep the air clean and pure. These small steps would help our earth to be healthy and clean. We should all take responsibility and sincerely follow this advice.

Sanvi Goel 2C

What I Want To Be When I Grow Up

I would want to be a car manufacturer I make and put. Also because I would be able to make new fast cars which have never been made. I would also make monster trucks that could hover anywhere. It would be fun to design new cars but a lot of hard work too. Everyone would love to buy my cars. Also, I would make very fast racing cars, but I would have to take help from my partners because it would be hard. I could make them go very fast. I would make them cheap so that everyone would be able to buy engines when I grow up because of all the new tools that I would be able to use and all the kinds of different them. I would also give one car free in the beginning. I wish I to be a car manufacturer one day.

Namish 3E

Our School Trip To The Station

As a part of our ongoing unit, 'How to organize ourselves', we went for a trip to from our school, to the fire station on 22nd April and it was a wonderful experience for us! We learnt how important fire prevention and fire safety really is. At the fire station, we had the opportunity to meet real firefighters.

First they showed us the fire trucks and explained how they work by throwing out water. We saw the special uniforms they wear and the equipment that firefighters use. They told us about the emergency number for fire services in case of fire, which is- 101. We were also told about the different ways to prevent fire at home. That convinced us never to play with matches or lighters and also never to play near gas stoves, electric heaters and fireplaces. We had a very useful day at the fire station and learnt a lot.

Kaashvi Bajaj 2C

Shifting To My New Home

When I was four years old, I moved from the United States to India. At first, I spent a couple of months in my Nani's home as my new home was not ready to live in. I was missing my old home, family and friends.

One day, in the middle of the night, I woke up and found myself in a strange place and saw a door which was closed. I opened the door and got scared of the extremely high ceiling and dark staircase. I went back to my room and couldn't sleep properly. In the morning my parents welcomed me in my new home. After roaming everywhere I felt nice as all the balconies were full of greenery. Slowly we decorated the house with love. It was not scary anymore.

I felt thankful to my parents. Slowly I got settled in my new home. I feel very comfortable in my new sweet home.

Any new place can be made into a warm living space with love and mutual nurturing.

Shivanc Trivedi 2C

Let's Make a Pledge

Plants are a very important part of our planet. If plants disappear, the world will never be the same again. There will be no food, no rain, no oxygen and no beauty, only emptiness and pollution will remain. People as well as animals will fight for food and finally none will survive. So let us take a pledge to care for our existing plants and continue to grow more and more new plants. Once we grow new plants, we should not abandon them. We should continue taking care of them just as our parents continue to take care of us. Plants will always keep us healthy and the world forever beautiful.

So friends, let's take a pledge to nurture plants for a healthy future. Let's promise each other not to cut down trees. Let's become the parents to our plants from today onwards.

Sownya Wadhwa 2E

The Chinese Dragon

In China, there is a river called Yangtze. In the river, there lived a dragon named Thagutanka. He often used to go to the Bamboo forest. In the forest, he used to eat up the pandas. One day, he thought of having a human feast instead. When he went to the Great Wall of China, at least 3981 soldiers started attacking him because they had heard of the dragon's cruel plan. When the people of China found out that the dragon was dead, they started to dance to celebrate the end of the dragon.

A person or animal who is selfish is always going to be unlucky.

My School

My Little Fruit Basket

In my fruit basket I found,
An orange round, round!

The watermelon is juicy and red,
I love to eat it before going to bed.

Mango is plump and yellow,
National fruit of India is this fellow.

Banana is sweet and lovely,
It can be eaten even during recovery.

Apples can be red, they can also be green,
Let's all be healthy and clean.

Nivriti Agarwal 2D

School days are so much fun,
Where we study, dance, sing and run.
Everyday a new thing is learned,
And a new friend is earned.
We study, we play, we act, we sing,
And eagerly wait together for the bell to ring.
When I first came to school I was scared,
Fear disappeared slowly with my teacher's care.
In school we learn everything under the sun,
Creative teaching makes it fun.
We make trips to the zoo, farms, factories and museums,
Which helps to clear a lot of confusion.
We love to read library books with interest,
We read so much that we forget to rest.
School lunch-time is filled with action,
As we meet our friends from different sections.
We love summer holidays too, as we can travel,
When new things we always unravel.
I love this school and no other,
This will also be the school for
My little brother!

Nia Anjali 2E

Mom In My Life

Mom is my pleasure,
when I am sad.
Mom is my anchor,
when I am guilty.
Mom is my consultant,
When I am upset.
Mom is my eye,
When I am afraid.
Mom is my life,
When I am ill.
Mom is everything,
In my life.
I love my mom very much.

Ahil Chowdhury 3C

Summer Is Fun

The early learners have been exploring the yearlong Unit of Inquiry – under the theme ‘How the world works’ with the central idea ‘Earth’s natural cycles influence the activities of living things’. They have been exploring the following lines of inquiry:-

- ◇ Seasonal change: Change
- ◇ My responsibility towards my health during changing season-Responsibility

The inquiry into ‘Seasons’ is being done through plethora of engagements. To make their learning interesting a ‘show and tell’ engagement was planned for them. ‘Show and tell’ isn’t just about giving the child a reason to bring things to class; each child’s social, emotional and language skills are made to grow. The early learners developed the use of descriptive language, enhanced their listening skills and shared their special items with others through this activity.

To add on to the fun and frolic the learners enjoyed making lemonade in the class (cooking without fire) and also enjoyed eating watermelon and mangoes (summer fruits) during the summer party. They went back home with great learning about the season.

टेक्नोलॉजी

टेक्नोलॉजी आज के ज़माने में बहुत ज़रूरी है। अब हम सिर्फ़ टेक्नोलॉजी पर निर्भर हैं। अगर कुछ भी जानना हो तो हम मोबाइल फोन या कम्प्यूटर लेकर बैठ जाते हैं। इतना ही नहीं, हम टेक्नोलॉजी का इस्तेमाल अस्पताल, स्कूल और पुलिस स्टेशन आदि में भी करते हैं। लेकिन टेक्नोलॉजी खतरनाक भी हो सकती है। लोग एक-दूसरे की जानकारी को हैक भी कर सकते हैं। इससे चोरी का काम भी आसान हो सकता है। इसलिए टेक्नोलॉजी का सही ढंग से इस्तेमाल करना बहुत ज़रूरी है।
