Reference No.: 2019- 20/ 048

23rd September 2019

Dear Parent,

SUB: 24 X 7 ASSISTANCE ON CALL-ARTIFICIAL INTELLIGENCE ASSISTED VOICE BOT

We are happy to introduce “Genelle” the GGS 24x7 Assistance On Call-Artificial Intelligence Assisted Voice Bot.

Designed by the mentors & scholars of GGS, she has been developed with latest AI technology to empower parents with day to day information independently.

Artificial Intelligence is now a part of our normal lives. We are surrounded by this technology from automatic parking systems, smart sensors for taking spectacular photos, and personal assistance. All this development in AI, has created scope for learning it, as subject and changing the traditional methods of teaching & learning in schools.

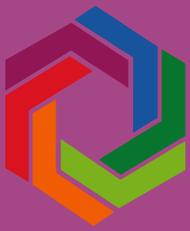

Currently available on +919711000560 at the School Reception, Genelle will be happy to answer your questions, which can be largely based on the examples shared in the details attached. Her capacity to answer more questions will increase as she gathers information through all her interactions.

Should you have any feedback, post your interaction with Genelle, please feel free to email info@genesisgs.edu.in

Looking forward to your support in making this a successful project for our scholars and community.

Best Wishes,

The School Office

24 X 7 Assistance on Call

Artificial Intelligence Assisted Voice Bot

Hello, I am Genelle
your virtual assistant.
How can I help you ?

SMART FEATURES

24X7 accessibility on a call

Get all the handy information
instantaneously

Capable of doing conversation
using NLP & NLU

Personalized information using
AI technology

AI Powered
& Self learning

Smart notification on SMS
& e-mail

“ARTIFICIAL INTELLIGENCE is now a part of our normal lives. We are surrounded by this technology from **automatic parking systems, smart sensors for taking spectacular photos, and personal assistance.** All this development in AI, has created scope for learning it, as subject and changing the traditional methods of teaching & learning in schools.”

The rise of AI and “deep learning”. AI-based systems derive their knowledge firstly from the initial data, programs and algorithms provided by human programmers. Secondly, they “learn & grow” through their own experiences and observations without being explicitly programmed.
