EDITORIAL

As the online academic session 2020 - 2021 comes to an end and we share the last issue of 'The Bugle' for this period, it is also time to update our valued readers about the editorial board. We continue to have with us our editors Ms. Smriti Sajjanhar and Ms. Shivani Singh who have been a part of the board throughout the last session. We now also have with us, Ms. Rashi Kataria who has joined as an editor. This issue onwards, Ms. Nancy Mondol, is taking up the responsibility of being the journal's full-fledged designer. The Editor in Chief continues to be me - Alka Sarkar. This issue promises to be exciting with new features and reflections of our PYP graduates - the fifth graders as they move into the middle school.

As usual it has been a delight to keep abreast with the thoughts and actions of our young students, teachers and parents. It is time to thank the contributors for writing for the journal and keeping it alive, regardless whether those articles have been published or not. Each piece of writing and art is valued and an indication that perseverance leads to immense learning and success. Just a gentle reminder, only reading and reading more, will churn out better writers. Let us take up this challenge jointly and inculcate the love for reading in ourselves and our young students.

Till the next issue,

Alka Sarkar
Editor in Chief, The Bugle

From the Principal's Desk

Making Children Future Ready

Each day in the year gone by has been bizarre, full of new experiences, challenges, problems, and their solutions. The world transformed from real to virtual, in a span of few days.

These are hard times and our children have not lived such a harsh life ever, it is up to us how we help them to respond optimistically to these times. There are so many questions plaguing our minds as parents and facilitators.

In today's times and context, it is imperative we focus on building skills and developing areas beyond intellect. It is important to draw our focus towards developing social and emotional skills in young learners and build resilience. A resilient mind can strive to achieve anything, because success and failures drives people equally and the students have something to learn from both.

Right from early childhood we need to start building resiliency in children; teach them that it is okay to fail, but after failing they need to find the reasons for failure, rectify them and work again; teach them to keep striving towards their goals and not give up. Children who take up competitive sports from young ages, know how to handle failures and work harder to overcome those. Sports teaches you to take success and failures in the same stride and build on your capabilities. I have yet to come across a sportsman who gives up easily. We tell children to show sportsman spirit, but do they know how sportsman spirit feels and looks like in real time?

The past year has been tough for all of us and I am sure we have pushed and pulled ourselves to deal with it. I wonder to what extent have we pushed our children, to endure the hardships of life, to be okay with some ungranted wishes, to find happiness in smaller things in life and above all to learn to survive and be grateful for what we have.

"Do not judge me by my success, judge me by how many times I fell down and got back up again." – Nelson Mandela - this is one of my favourite quotes; as the world sees only success, it fails to see the continuous hard work behind that success and the number of failures that only strengthened the resolve of the mind to push forward. The world forgets that only a resilient mind will keep trying till it succeeds. A resilient mind does not give up, but keeps forging ahead, weathering the storms and difficult conditions towards achieving its goals. Let us together build that steel into these children, for them to face the world ahead of them.

Importance of Life Skills in School

Current 21st-century literature indicates that our future citizens need to be multi-literate, creative and innovative (Shifting Minds. 2012:4). Life skills are also important ingredients for a student's success. The elementary years are a time when students begin to develop their academic self-concepts, life skills and their feelings of competence and confidence as learners. They are beginning to develop decision making communication, life skills as well as character values.

The knowledge, attitudes, skills including life skills that students acquire in the academic area and personal/social development during the elementary years, serve as the foundation for their future success in their school and community; it prepares them to be effective global citizens. Genesis Global School also considers this concept an integral part of the curriculum and has introduced it at the elementary level in grade one and it is being implemented for primary year students.

To help children with life skills, the school believes in a 'growth mindset'. When the school inculcates this as a practice, children start enjoying learning more. This helps them achieve success in any area as they grow. The students do not hesitate to ask for help, they are ready to put efforts and love taking new challenges. The children are encouraged not to be afraid of failures and view mistakes as opportunities.

Keeping the holistic growth of children in mind, the school is practising and conducting hands on workshop-based sessions on a regular basis. Sessions on self-awareness, organisational skills, interpersonal skills, values, minimalism, time management, empathy, gratitude, health and hygiene, safety measures, screen time tips and so and so forth are regularly held. Let us all join hands and encourage our children to be equipped with life skills so that they can face the challenges life throws at them, competently.

Anju Saxena

Head Learning Support

Through the Lens of a P.E. Teacher

When corona shook the world in early 2020, everyone around the world was wondering how things would work out, would this phase ever end? Just as the world was wondering, GGS was making plans too. Before the online classes began, we had several meetings and came up with probable solutions. We trained to use Microsoft Teams and prepared for the time that was coming ahead.

All the departments in the school started working on their virtual skills and therefore a change was also needed in the sports department. A big challenge faced us as we were going to start virtual classes for different sports. Though it was a different kind of environment both for students and teachers, yet we all had to overcome this difficult time together.

As the classes started, all the children were very excited to come live onscreen with their teachers they used to meet on a daily basis in the school campus. Sports classes were the ones students waited to happen as during COVID 19 they could not go out, do any exercise and were clueless about how to stay active and healthy. Students could access the channel of their preferred sport and utilized this time to understand the game better.

Students across the school were attending numerous academic classes and were required to sit on their chairs facing the screen for long periods of time. The sports classes took over and made sure the students get some exercise and a well deserved break from screen time.

Students were delighted to start training with the teachers and get fitter as they were all involved with at least one sport in the school and wanted to make sure that when they come back on the grounds, they were better than ever. As teachers, we polished our skills every day in this teaching and learning process. This situation made us all think out of the box, be creative with what we do, use different methods and tools to teach and take quick actions when things did not go right.

Yes, it seemed all good, but we did face technical issues. A common refrain during classes was -

"Ma'am I can't hear you" or "your voice is cracking" or "your video has paused" and so on...

A response we often got from the students when we wanted to see them live onscreen and told them to turn on their videos was -

"Ma'am my camera is not working, I'll get it fixed" or "when I turn it on, I automatically go out of the class" or "I'm using mobile data" and so it continued with numerous new techniques that students learnt during lockdown.

Nevertheless, it was a bittersweet experience for us, full of new challenges and obstacles every day. At the end we surely learned a new way to teach. All the sports teachers always get delighted after a tough workout class, as that is how they want their students to be, fitter than ever!

Kindergartners Turn Designers

Under our current Theme 'How the world works' with the Central Idea 'Understanding the way materials behave and interact determines how people use them', the enthusiastic students of Kindergarten inquired into the material 'wood'.

Students brainstormed and explored the properties of the material 'WOOD' with the help of the learning tool - Edward de Bono's 'Six Thinking Hats'.

Students displayed their thinking skills with the 'Green Hat' which focuses on creativity, possibilities, alternatives and new ideas. This particular colour of the hat deals with the opportunity to express new concepts and new perceptions.

Students were asked to arrange wooden scraps, blocks, tooth picks, match sticks, wooden spoons, ice cream sticks, chopsticks, pencil shavings and old unused pencils.

They then used a Makerspace planning sheet to record their final plans and ideas about what they would want to create with wood. They were given the voice, choice and ownership to plan their design. They shared their ideas with their friends and teachers. They also understood the key concept 'Change' by doing an in-depth inquiry about how the material changes when we manipulate it.

Kindergarten Mentors

My Life

- My hands are for clapping
- My legs are for dancing
- My arms can hug you tight
- My finger can turn on the light
- My nose can smell
- My mouth can yell
- My eyes help me to see
- My ears are for hearing
- My cheeks are for blushing
- And I love all of you
- I hope you all love me too
- I always give my best
- On God I leave the rest

The Sun

The sun shines so bright,
With all it's might.
The sun gives us warmth and
light,
But in summers it gives us a
fright.
The sun has a right ,
to shine on the other side in
the night.
The sun sets up a fight ,
When the clouds show their
flight.

It Is Springtime

It is springtime,
After such a long time.
I never have seen so many flowers,
They bloomed just as me.
I have never seen so many flowers.
Like pretty colourful towers.
And now March is here,
So no more cold is there,
Because spring is here.
Pack your thermal and
jacket,
And take your ball and bat,
Gone are the days
When in quilts, we just sat.

Winter Fun

Winter is one of my favourite seasons,
To like it, I have many reasons.
Hot chocolate is my favourite drink,
I can have it in a blink.

Bonfire is for festive night,
Soaking sun in daylight.
Winter brings a memory,
Of making snowballs my
accessory.

Ho Ho Ho - Santa arrives,
In the winter, in our lives.
I was born in winter season,
Well ! That's an important reason.

Shivanc Trivedi

My First Snowfall

The year of 2020 was full of lots of firsts in everyone's life. The lockdown was good in few ways while not so good in others.

Due to COVID-19, I got to spend the winter season in my homeland, Kashmir, for the first time. I along with my brother waited eagerly for the snowfall. We used to pray everyday for it.

Then, one fine morning, we woke up to experience our first snowfall. The snowfall was so dense that we could not see anything else. We both were super happy and for us the real fun had now started. We wore our traditional attire (*phirans*) and snow boots and went out to play in snow. Mother taught us how to make snowman and a snow castle. We had lots of fun and we were happy. We got to see icicles for the first time. After running, jumping and rolling in the snow, it was time to go inside.

We came inside our room, called *hamam* to be welcomed by a surprise. Mother had prepared a lovely treat of Kashmiri *harrisa* (winter special dish) and hot cup of *Kehwa*. We sat beside a window and enjoyed our meal while watching the snowfall, our snowman and the castle we had made.

It was a lovely experience. We loved every bit of it and this will remain a beautiful memory in our minds. As elders say, we should find good in everything, so for me, I am trying to find the best in the given situation of COVID-19 lockdown by playing in the snow and finding joy in small things..

Old Times

In the world there was a time
 When we think there was absolutely no fun!
 No electricity for gadgets to run,
 No device was available for fun.

But this does not mean
 People were bored,
 They had their interests
 And things to be stored.

They had their own style of living,
 Hunting, gathering, and sharing,
 They were very caring,
 And the world, they were valuing .

Climate change

Nowadays too much climate
 change happens,
 as forest fires occur now and
 then.
 There is too much unrest,
 as, we see many protests.
 Global warming warns us,
 Nature is never to be messed with.
 This has become a worldwide stress.
 If the plants this way dry,
 each creature shall surely die.

Smayra Goel

Best Buddies

Once upon a time, there was a boy named Arsh. He was seven years old. He loved his pet dog Leo and used to play with him. He used to throw the ball away and Leo always fetched it for him. They both were inseparable.
 One day Leo disappeared, Arsh was worried and very sad for Leo. He searched for Leo everywhere. After some time he found that Leo had fallen into a trench, which was dug for construction. Leo was badly hurt and was crying for his master. Arsh wanted to help his dog, so he called his friends for help and made a plan. They pulled the dog out with the help of a rope. Leo was also very happy after seeing Arsh and started wagging his tail. They took him back home, nursed him and gave him food to eat. Everyone appreciated Arsh for his caring attitude.
 Animals are our friends and buddies, we should love and take care of them.

A Perfect School

I am lucky to be in
 such a school,
 With a sports hall and
 a swimming pool.
 They serve us lunch
 and breakfast
 This is a school that
 you can trust.

They teach you all that you need to learn,
 The students raise their hands and wait for
 their turn.

This school is such a one,
 That there is no denying fun.
 Do you know which school is this?

It's a school called Genesis!
 Genesis Global school,
 It's the school beyond cool.
 I am lucky to be a student,
 For all the teachers are so prudent.
 So come, come to this place,
 The school is cool and full of grace.

Friends

Friends are our life,
 Life, life, life,
 What do we do,
 Without our friends,
 Playing....Birthdays.....Stories....
 Nothing looks good without them.
 Friends are our life,
 Life ,life, life,
 Let's promise, we will be together,
 Even when Corona doesn't let us meet.
 Friends are our life,
 Life, life, life!

Maira Singh

No Child Labour

Although I am too young to understand this, I have often heard my parents and other elders say that childhood is the best phase of one's life. It's filled with joy, learning new things and is stress free.

All of us here are blessed to have a wonderful childhood but sadly it's not true for all children. Today many children around the world are involved in physical work to earn a living, while they should be at school, learning new things. Through the poster in the picture, I want to express that education gives wings to children to soar high. So, say no to child labour.

Healthy Life- My choice

My choice is to be healthy, eat healthy and stay healthy. We all should eat a good amount of vegetables and fruits. We should drink plenty of water to keep ourselves hydrated. Playing and exercising are good for the body and meditation is good for the mind and soul. We should avoid junk food as much as possible and get plenty of rest and sleep to recharge our body.

A Happy Scarecrow

Once, there was a farmer. He made a scarecrow to guard his field. One morning when he woke up, he saw his scarecrow was broken. He became very sad. Then, he made another very big scarecrow. When birds saw such a big scarecrow, they got scared and flew away. This made the scarecrow very happy. Thus, the farmer realized that we must not lose hope and continue to work hard till we succeed.

Say No to Plastic

Plastic here and plastic there,
It is causing pollution everywhere.
Our rivers look like a drain,
Our Mother Earth is for sure in pain.

From morning till the night,
Aquatic animals keep up the fight.
'Say no to Plastic' is the only solution,
To put stop to the water pollution.

Avoid single use of plastic,
To make oceans look fantastic.
Cloth bags and steel straws must be promoted,
To keep the marine life protected.

Golf

Golf is an outdoor sport which is played in large open area or field called 'Golf Course'. It has trees all around and sand pits, making the game tough.

On a cold winter weekend, I went to the golf course to start learning golf. My coach made me run around the golf course two times in order to warm up before the game. I played with a putter on the learning range. I really enjoyed the game as I had always wanted to learn golf. I would like to go again and maybe you should try it too.

An Amazing Trip

For this new year eve celebrations, I went to Lalit Mangar. The hotel is in Faridabad and it's a very good hotel. We went there by car. I went with my parents to spend few days there. We did so many activities there, like pottery and made a so many things namely flower pots, money bank and diyas. I did cycling with my Mummy and Papa. We went for star gazing, in which I saw the moon, stars and also the planet Mars with the help of a telescope. I was amazed to see the Moon; it was looking so cute and beautiful. I was also able to see the craters on the Moon. We did many more interesting activities, and I enjoyed a lot. It was the most wonderful trip I had.

The India Of My Dreams

In my country, there will be peace and harmony. Everyone will be treated respectfully and equally. Every citizen will be educated. India will be free of violence, crime, hunger, and suffering. There will be no shortage of natural resources. There will be no cruelty towards animals. There will be no child labour and every Indian will be happy. This is the India of my dreams. I will certainly do my best to make my dream come true.

New Game

I like dogs,
They love to hog.
They are my favourite.
They feel happy hap hap,
When we put them on our lap.
And they are nice,
They like to eat curd and rice.
They are also very friendly.
And they do not like to be lonely.
They like to play, nonstop everyday.
I also have a pet dog, Simba is his name.
Playing with him is my new game.

Antibiotics: friend or enemy

Hey! I am here to tell you about bugs,
If you have the viral kind you definitely
need to avoid hugs,
Microbes are virus, fungi and bacteria,
For taking an antibiotic you must fit the
criteria.

When you have a bacterial infection
there are some rules,
Taking Antibiotics without asking the doctor is done by fools.
Some things cause antibiotics to stop doing their work,
That will cause the bad bacteria to lurk.
Taking them without prescriptions, self-medicating and taking
improper dose,
These are the things that will make the good bugs die and the
bad ones pose,
When you are really sick and you really need the medicine,
That's when you would not want the antibiotic to be resistant,
So wake up, be hygienic and be smart,
Now is the time to listen to the advice and play your part.

Brownie in 5 minutes

INGREDIENTS

- Refined flour – 1 cup
- Coco Powder – 4 tsp
- Baking Soda – ½ tsp
- Coffee – ½ tsp
- Curd – ½ tsp
- Sugar – ½ cup
- Oil – ¼ cup
- Milk – ¼ cup
- Vanilla Essence – ½ tsp

Recipe – Sieve together all the dry ingredients in a flat bowl. Add sugar, oil, curd and mix well.

Now add vanilla essence and milk and mix it thoroughly. Bake in the microwave for 5 minutes.

Garnish it with chocolate syrup.
Brownie is ready to be served.

Parents' Corner

Childhood

We jump, we dance,
As if in a trance.

We run, we shout,
Like our teeth will fall out.

We hop and swirl,
Without a care in the world.

We hide and we seek,
To find us it'll take a week.

We crave and we eat,
Till our tummies feel the heat.

We slide and we roll,
Till the mud covers us whole.

We live and laugh,
And the world is aghast.

We're children,
Living the best time of life, there could ever be!

Happy Me

Ahaan is my name,
I love to play a game.
Playing is lot of fun,
Especially under the sun.
I like to play cricket,
My brother bats and I take the wicket.
For me happiness is the best,
A feeling different from the rest.
It makes me smile,
One that reaches a mile.
It sounds like the wind,
When I am on the swing.
It tastes so sweet,
Like chocolates and treats!
Thank you God for this new day,
In my life to work and play.
Please be with me all day long,
In every story, game and song.
May all the happy things that I do,
Make my teachers, friends and family happy too!
I wish school opens soon
So I can meet my friends in the class room!
Ask them riddles and play with them,
I hope this fun time never ends!

Why a Little Vacation is Needed in this Corona Time

Are you bored of staying indoors? Are you bored of only having to watch TV and doing homework? Are your parents always trying to discipline you? Then It is time for a tiny break.

In this Corona time, it is a struggle to be at home, practically doing nothing. It is also very boring to play with the same toys and watch the same TV programmes. Online classes are very painful for many students as they can see their friends on their screens and are unable to play and chit-chat with them. Only a glance of school can make a child/teenager happy.

So, the main point I want to talk about is that we all need a stress-buster vacation in these hard times. It would be awesome to spend time with family and friends somewhere. It would also be relaxing and fun. Many people take too much stress in their heads and can not sleep at night; my suggestion can be very helpful for them.

It does not matter whether it is a 5-day Vacation or a 1-night getaway.

People who do not want to spend days in resorts or hotels, they can have a family road trip, by which I mean that they can roam around in their vehicle somewhere. A stress-free vacation can relax and calm their body and mind, and after the vacation, it will help them to remain calm at home too.

Many kids are wanting to go on a trip and plead to their parents, but parents, refuse to go out as it is not safe. So, my message to those kids and parents is, that they both are correct. We can also walk around in the parks, but in my view, we will be much more relaxed if we visit places, we really want to go to; after all, we have been through a lot in these 10 months and now it is time to end all this stress.

Let's Share A Laugh

Q: Why did the math book look so sad?

A: Because it had so many problems.

"If I reduce it anymore you won't be able to read it."

On the first day of school, the teacher asked a student, "What are your parents' names?" The student replied, "My father's name is Laughing and my mother's name is Smiling." The teacher said, "Are you kidding?" The student said, "No, Kidding is my brother. I am Joking." 😄

My Visit to Hyderabad

I spent my holidays at my maternal uncle's house in Hyderabad, the capital city of Telangana. Hyderabad is famous for pearls and biryani. I had enjoyed eating biryani, ice-cream, chocolates, and fruits. I met my Grandparents and cousins. I celebrated the new year with them. I visited Ramoji city and Hussain Sagar Lake. My Mother bought Hyderabad's famous pearls. I stayed in a colony named Banjara Hills. While Delhi was cold due to winters, Hyderabad had warmer climate. We didn't have to wear sweaters at all. I really enjoyed my stay in Hyderabad.

Facts about the Taj Mahal

- Shah Jahan built the Taj Mahal in the memory of his wife Mumtaz.
- It was built in 1632 and it took 22 years for its completion.
- It was built by using Makrana, a white marble which changes colour according to the light which falls on it.
- The 4 pillars of the Taj Mahal are inclined towards outer side, so that if there is an earthquake then the pillars will not fall on the Taj Mahal but on the outer side.
- The Taj Mahal has the longest echoes of any building in the world.
- Taj Mahal has a false tomb over the real one, which is at a lower level.
- Shah Jahan also wanted to make a black Taj Mahal, but his son Aurangzeb locked him in a prison in Agra Fort because he thought that Shah Jahan was wasting a lot of money of the country.

Driverless Trains

The first driverless train was built in Japan. In India, driverless train was launched on 28 December 2020. It was flagged off online by Shri. Narendra Modi, Honourable Prime Minister of India. These trains will now run on the Magenta Route of Delhi metro. These trains will have drivers for the first few weeks, who will later be removed. The trains will be controlled from a control room. There will be some safety rules that will be followed.

1. The trains on the same track will stop at a distance and will not crash as they have sensors installed.
2. Sensors on the doors will not let the door close until all passengers have boarded or disembarked the train

The first five trains launched on Monday, 28th December 2020, will cover 37 kilometers of Magenta line and can go up to a maximum speed of 35 Kilometers per hour.

Congratulations to the DMRC on this achievement.
Looking forward to a great trip in these technologically advanced trains.

THE MERMAID

Aha!! The Ocean Became Clean Once Again

In an ocean, lived a mermaid family. The family had only a mother and a child. They lived happily until one day, garbage came falling in the ocean. The garbage was polluting the ocean.

Since Mother Mermaid could speak and understand human language, all the sea animals asked her to tell the humans to stop polluting the ocean. The mother mermaid spoke to the humans and told them to stop polluting the ocean, which is home to so many sea animals. The humans asked the mermaid, "how do we do that"?

She told them about the 3 R s. Confused humans asked her for more details and thus she shared with them various ways to reduce, reuse and recycle waste materials. She explained to them that— reduce is to use less waste, reuse is to use the waste again and recycle is to treat waste material and use it for some other purpose.

Once humans adopted these steps of 'Reduce, Reuse and Recycle', the ocean became clean again!

Doozy Dos

Do what you love.
 If you know not – what you love,
 Worry not, there's so much to buff.
 Believe in yourself, nothing is tough.

Do things that you enjoy.
 Little bundles filled with joy.
 They will spread the positivity,
 Tending to their simplicity.

Do spend time in the lap of nature,
 Prepare yourself for a better future.
 Nourish yourself with deeper meaning
 Enrapture by a purpose – that is pleasing.

Do make time for your passion,
 It's easy to course into action.
 Find your flow,
 Tremendous thrill, you will undergo.

Do show your gratitude,
 Let it manifest in your attitude.
 Count your blessings-
 Observe what your heart possesses.

Do embrace empathy.
 Stand for your community and inspire the
 humanity.
 Make difference with your vivid imagination-
 Perfect Planet – Under Creation!

Rashi Kataria
Teacher
Learning Support Department

Dear Diary,

One day when my sister and I were coming from school, we saw our neighbour throwing stones at our pet dog. I ran to its rescue while, my sister swiftly ran to our house to tell everything to our mother. My mother shared a cordial relationship with our neighbour and she sprinted across to our neighbour to explain that it was our dog and he should not throw stones at it. In the meanwhile, I got hold of our dog and bolted inside our house. The neighbour understood what we were telling him and told us that our dog was barking loudly and had startled his child, who had started crying. He said that he tried to stop the dog from barking but to no avail, that is why he started pelting stones at our dog. From then on, such a thing never happened again.

I feel very strongly about animals, especially about saving endangered and extinct animals. Many animals are kept in the zoo which is like imprisonment. They are kept there for no reason except for us to behold them. I don't like non vegetarianism too. I feel very bad for animals which are hunted and slaughtered. It agitates me and makes me sad. These are my thoughts for today's diary.

Ocean Adventure

I was on a cruise ship in the North Atlantic Ocean. North Atlantic Ocean is one which also contains the Bermuda Triangle where anything and everything gets sucked into the ocean without a trace. I was enjoying the beautiful morning and lovely sea breeze on my cheeks. It was lovely to watch birds flying and for a moment I too wanted to have wings. What happened thereafter was unexpected. As we watched from a distance, we saw the pirates looting a ship. They looted gold, silver and other precious things such as spices and medicines that were being carried in the ship. They had guns and swords and held people hostage. They did not allow the hostages to even walk on the plank of the ship. Our ship finally took another route after informing the authorities about the situation. We enjoyed the rest of our journey and we once again started seeing an endless variety of fish, seals and squids. I LOVED THE OCEAN JOURNEY.

Reflections by PYP

Graduates

My journey of PYP so far has been very exciting. I have learnt so much over the years. I have developed my research skills in this programme. I can now look up for information on any topic and can make presentations about it. The IT skills are very useful nowadays and I enjoy using them too. I will always cherish the memories of my classmates but more so of my teachers as they have helped me so much to develop my reading and writing skills. They have encouraged me to grow in confidence and to be my own self. I love the fact that they recognize the potential in me and help me in every way to foster it. I love my classroom and I miss it these days. I wish I could go back and have some fun in school.

Paramvir Dayal Singh Sandhu
5A

My journey to grade 5 in Genesis Global School had started from Reception now called Nursery. I used to have a lot of fun and I used to get free at 12 pm itself. I made a lot of friends and I was good at academics also. Every grade I had something new to learn. My school also taught me how to discipline myself and respect others no matter what age. But I had to learn it the hard way as I was a really naughty boy, however my teachers seemed to like me a lot. Now I am an intelligent, disciplined, responsible and a happy boy. I enjoyed all my sports classes and that helped me keep fit always. I had 7 amazing years .

Adrian Tito
5E

My PYP journey has been very enriching and one in which I have gained immense knowledge. I have refined myself and seen a growth during my six years in Genesis. My mentors, peers and my parents have been my backbone during my journey. PYP has always guided me to set goals and to achieve them. I have developed myself as an independent individual, risk taker, open minded and caring person. I have polished myself to develop the five essential skills to be a thinker, a communicator, to do research work, have social interactions with different people and manage myself as a person. I have always pushed myself to be a better human being and a learned person. I have never given up, rather I have learnt from my mistakes. It has been a very smooth journey and not a roller coaster ride. Sometimes though, it was a little challenging but I tried to overcome that with the help of my mentors.

Sharvi Chadha
5B

I came to Genesis Global School in grade 2. I have learnt a lot from grade 2 to grade 5. The teachers in this school are very nice and they teach very nicely. They helped me a lot in learning new concepts. I have developed a lot of skills like communication skills, thinking skills and listening skills. We also did a lot of research work, so I have developed my research skills also. I enjoyed my ICT lessons a lot. I also enjoyed rock climbing in the school but this session it was not possible because of COVID-19 pandemic. Now, I am shifting to Nagpur in March. I know that I will cherish my days in this school forever and hope my next school will be as good as GGS.

Manan Mokha
5A

When I look back on my journey of PYP, happiness reflects on my face because of all my wonderful experiences. I still recollect the warmth from my classmates and teachers when I had just started school. I had the best memories of my life in PYP: learning about electricity, civilizations, and migration, taking part in the school assembly, having fun in the class party. I also got to know about many new subjects, such as ICT and Robotics and I enjoyed being a part of clubs. Although the corona issue has refrained us from meeting physically, having everything online has helped us to be connected. We showcased our talent, knowledge and made our bond stronger than ever. My time in PYP is one I will never forget. Although I am a bit sad to leave PYP and go to MYP, I am also very excited as I will learn many new things and have new friends in grade 6.

Ayan Azad
5D

Reflections by PYP Graduates

I enjoyed my journey of fun and learning from grade 1 to grade 5 at Genesis Global School. I shall forever cherish my off-site experiences at Camp Muddy Boots, The National Museum Of Natural History, The National Museum and Jim Corbett National Park. I made lots of friends from the start with some of them, growing closer during this journey. I developed skills of befriending my peers, forgiving being forgiven and overcoming conflicts by valuing my friendships and accepting them as they are. I understood that each one of us have their own strengths and weaknesses and by working and learning together, we can achieve a lot.

I thank and highly regard all my teachers for their invaluable contribution in all aspects of my learning and shaping my personality.

Elisha Wadhwa
5A

My journey started in Reception class when I was 3 years old. One of the most memorable event that year was to dress up in our coolest summer clothes. We had fun time frolicking around in our summer wear. As I grew up and went to higher grades, I started to take part in inter-house competitions. A noteworthy experience was during an inter-house swimming competition, my friends started encouraging me when it was my round. Even though, I came second and not first but the bottom line was the fun, experience topped with an amazing squad of friends. The year ahead just got better, when we took a trip to Jim Corbett with the whole class. I couldn't believe when my best friends and I started giving my teacher pleading puppy eyes for us to be together she caved in and let us pair up! What joyful experience has my entire journey of primary years been!

Amyra Maini
5B

When I started my PYP journey I was new to the class and my classmates. I was new to Kahoot! and the IB learner profile. We used to play on the swings many times after breakfast or after lunch. I liked doing Math here because it was very interesting and the concepts were explained in a fun way. I enjoyed talking to my friends at the cafeteria. Last year we submitted our homework in the class but this year we pasted it on OneNote. This year I have become better at handling technology.

Aarav Mehta
5B

My journey through PYP has been fun. I started my journey from Reception, now Nursery and moved my way up to Grade -5 over these years. I met new teachers, learnt new skills, and made new friends! Some of the skills I learnt are Communication skills, Research skills, Time-management skills and more. Few of the friends I have made are Adrian, Karambir, Kabir, Agam, Divyansh, Dev, Aarav and Rohaan. My experience through all the classes has also been fun with fun activities starting in Reception to detailed research in Grade-5. My favourite subjects are UOI, Math and English. I loved my PYP years but now it's time to say goodbye to these fun years and move to CBSE, my new board!

Shaurya Gupta
5E

My PYP years were amazing. I learnt a lot of things and I made a lot of friends that taught me to be more cooperative and have teamwork in mind. It taught to be more alert and always be the best version of myself. It also taught me to be more critical and learn things properly. My favourite part was in grade 4 when we went to Jim Corbett National Park. There I learnt a lot of things like being independent its Importance, as it was my first trip without my parents. I learnt everything properly as it was taught in a very interactive and fun way. All teachers and friends too were very kind and supported me always in my toughest times. I will always love PYP and will have the best memories forever.

Abir Nair
5B

Reflections by PYP Graduates

My journey began when I first came to grade 4. I learnt a lot of new things which I had not heard about before like longitudes and latitudes, different habitats and making an E-Portfolio for the first time. I wrote different stories and learnt about genres. The thing which help me grow the most was learning how to write a letter and an article as it helped me when I had to communicate with my classmates online. I will cherish my trip to Jim Corbett forever because I learnt about wild life, saw different animals and spent a lot of time with my friends. I developed communication skills, thinking skills and researching skills by doing a lot of work online and in groups. What I like the most about my school is that we learn a lot of things using different methods.

Arnav Gupta
5A

I had an amazing journey through PYP with my new friends and teachers. I learnt new concepts, played, and interacted with them. I learnt to care for others and be nice towards everyone. I helped many friends who needed help and they extended the same to me. Along with classroom studies, I enjoyed every moment of my adventure trips, assemblies, and annual day events. I will always remember and cherish these memorable moments of PYP all through my life!

Tanzeel Islam
5D

I had joined school in 2017 when I was in 2nd grade and was very eager to learn. As time passed, I grew up and finally came to 5th grade. Although from 2nd grade till now, I have always got positive remarks from teachers, but honestly, I was a bit scared to go into the fifth grade, but I was wrong. My time in grade 5 went perfectly well and I loved to learn in the PYP. I will surely miss it when I go to the 6th Class.

Deepank Saini Sadh
5D

I was introduced to Genesis Global School when I was 5 years old. I loved my teachers immediately as they appreciated my feelings and thoughts. PYP helped in developing ones understanding. It gave you the confidence to research beyond books. PYP made me a confident and pro-active student. To all the students of PYP, I would like to say PYP is like a roller coaster ride. You will be scared of the unknown but once in it, it's super fun and is an experience which guarantees a huge adrenaline rush all the while!

Muskaan Mukherjee
5B

The teachers here spend more time with us. I learned so many thing like reading , writing ,speaking, swimming, basketball, piano and so many more things. Now I am a thinker and an inquirer. I can make presentations very confidently .My journey in the PYP year has been innovative and very interesting. Now I am ready to accept challenges . I would like to thank all my teachers and Genesis Global school .

Ansh Thakur
5C

My journey in the PYP years has been excellent. In grade 3 when I joined this school, I was very happy because I had come to a new school and board. The best part about IB board is that it helps us do a lot of research work. Some of the incidents which I still remember and will remember throughout my life was the trip to Jim Corbett, Annual Day and when I went to camp Muddy Boots in grade 3.

Reflections by PYP

Graduates

It has been ten years since I have been in Genesis Global School. Through my journey in Primary School, I made new friends and learned from different teachers. In this journey I learned and experienced a lot. The skills I developed were Communication Skills, Social Skills, Research Skills and Thinking skills. I hope that I continue my journey in Genesis Global School and make the school proud of me.

Yahvi Aggarwal
5E

I have been in Genesis for four long years. During these years I learnt many new things, the thing that really helped me grow was Trinity. Trinity made me a more confident person. I developed a lot of skills, but mostly social skills and thinking skills. I will cherish all the fun days forever. I like everything about Genesis.

Aarna Kushwaha
5A

It has been a roller coaster of laughter, emotions, learnings, unlearning, discoveries, expeditions, teamwork, collaboration, explorations, socialization, personality development especially in this pandemic, being mature etc. All my teachers and peers have been together at every step whether it is for good or worse. Unraveled the mysteries surrounding our world, health, and personality. I want to thank everyone even Didi's and Bhaiya's for never giving up on anything and showering us with love and care every day.

Avi Dhingra
5D

I joined Genesis in the 2nd grade, I was excited and nervous at the same time! But then I met one girl who was about to go to the 3rd grade and she was my future bestie! She introduced me to her friends in the bus and she told where my classroom was. Everybody was so kind including my teachers. I started to really like this school and the teachers. I had a lot of fun in the 3rd grade with my teacher and best friend! I ended up in the 4th grade and almost everybody knew me so I got myself some courage to speak to everyone; I even became the class representative. It was a huge responsibility. Then we had our first long distance trip which was exciting because I shared my room with three of my best friends. But all that came to an end because of COVID. I'm very mad at COVID-19 at this point because I can't have that fun and adventure again. But looks like COVID-19 has signed us up for another kind of adventure, which is online studying. Now I miss school more than ever. But I hate it that some teachers have left the school it would have been so much fun with them around. All teachers are very encouraging and caring. The skills I developed during these years are thanks to the PYP. I tried to imbibe all the attributes of the IB learner profile. Well anyway, I just hope 2021 will be very different and I hope we will be back to offline school,

Aarna Wahaal
5E

I have learnt many things in PYP and done many activities. I got a lot of encouragement and appreciation from my teachers. I have presented activities like 'Windmill model' for energy conversion, 'Water Gems' for properties of matter, Rainforest Biome and Muscular System. I did a lot of crafting activities and learnt to reuse waste. I remember trips to the adventure camp Muddy Boots and the Science Museum. I liked dressing up on Literary day and celebrating events and festivals with friends and teachers like Janmashtami, Christmas, Diwali, birthdays and other different occasions.

Saisha Tripathi

Reflections by PYP Graduates

This takes us back to grade KG, the class in which I made my very first friend in GGS, her name was Katyani. We shared a lot of memorable moments together, some of which were quite hilarious while the other ones were gloomy, but she was a great friend. Moving on to grade 1, I had improved a lot in my communication skills thanks to the great support from my teacher. I was now able to share my thoughts freely and confidently. Not just my communication skills but a lot more things like thinking skills, creativity, being courageous, manners and etiquettes, improved tremendously. When I came in grade 2, my best friend was Yahvi, we laughed together, we played together and we learned together; in fact, we still do it today! Grade 3 was a wonderful class as well. My best friend was Ambika. I remember that we used to draw together a lot, we even made cards and would surprise each other with them. Grade 4 was a year to remember. I improved in a lot of things about which I had confusion, but the most memorable thing was our trip to Jim Corbett. Not only did we learn about various types of flora and fauna and Edward James Corbett himself, but this trip also was a great opportunity to strengthen our bond with our friends. This brings me all the way to our present grade, which is grade 5, This was my most favourite year throughout my journey. I am really thankful to my teachers for being so kind and helpful, not only did they teach us but they also cared for us. Even in the ongoing pandemic, they organised meetings to make sure that our learning doesn't stop. Even my friends in this grade were amazing. I loved my journey in the PYP years!

Agrima Saxena
5C

My 'PYP Years' were marvellous and an unforgettable experience. I learned a lot about different subjects. My most memorable adventure was when my classmates and I visited the Jim Corbett National Park. During our trip, I learned about nature and its beauty, animals and their habitats and many more things. Day picnic-cum-adventure trip to Muddy Boots, Greater Noida in class 3 was also interesting and full of fun. There were many activities we did there and the food was so delectable. I will never forget my PYP Years ever and will continue to miss our Class 5 trip to Ranthambore. Thanks to all my teachers and Didis.

Daivik Sharma
5C

I love the outdoors and love coming to school. I have always enjoyed learning with my classmates. I have so many friends now. They like me and help me. My teachers love me and understand me. But I miss them now. It was very difficult for me to adapt to online learning. I never liked typing or reading on the laptop before, but in the last one year things have changed. I started understanding online lessons. I really like it when my teachers call my name and ask me questions and scold me when I do not do homework. I enjoy it a lot when teachers talk to me and play quiz time with me. I love doing exercises with my teachers and also enjoy my art lessons. I still hate typing but Mumma helps me. I love to do math. I like to do group exercise, but I am not able to understand who is talking when many people are online. My favourite part is break time. I miss some classes when I get tired looking at the screen for a long time. Now I have a pet dog. I like to play with him during breaks. I am happy the way things are, but I will be more happy when I will be going to school again. I love my school. I love my friends. I love my teachers. I love my life and I am proud to have the best people around me and I know they all are proud of me too.

नन्हीं परी

एक समय की बात है, एक बड़ा सा महल था।
उसके सामने एक बगीचा था। महल में
एक नन्हीं परी रहती थी। उसका नाम अरब्रटा था।
वह बड़ी दयालु थी। उस महल में एक जादुई छड़ी
थी, जो बगीचे में पेड़ों पर फल और फूल उगाती
थी। एक दिन परी ने जादुई छड़ी से कहा, "पेड़ों पर फल की
जगह चॉकलेट, कैंडी और बहुत सी मिठाइयाँ उगा दो।" छड़ी ने कहा, "ठीक
है।" अब सारे पेड़ों पर मिठाइयाँ, चॉकलेट और कैंडी लग गई। अगले दिन
दो छोटे बच्चे आए और बाग में मिठाइयाँ देखकर उनका मन ललचाया।
दोनों ने साथ में मिठाइयाँ उठा लीं और लड़ने लगे कि यह मेरी है। परी ने
उनकी लड़ाई सुनी और महल से बाहर आई। परी के आते-आते बच्चे रोने
लगे। जब परी आई तो उसने उन दोनों की मदद की। दोनों बच्चों ने
लड़ाई बंद कर दी और दोस्त बन गए। परी ने दोनों बच्चों को मिठाइयाँ
दी और फिर वे अपने घर चले गए।

Riddle Time

1. What has hands, but cannot clap?
2. What can you hold in your left hand but not in your right?
3. What has many teeth, but cannot bite?
4. I am an odd number. Take away a letter and I become even. What number am I?
5. Three doctors said that Bill was their brother. Bill says he has no brothers. How many brothers does Bill actually have?

Interesting Idioms

Idioms are a group of words with a special meaning. The meaning it sends out is symbolic in nature and may be very different from the actual meaning of the words altogether. This characteristic makes them difficult to understand at times.

However, they have a sense of mystery and fun about them as well. Here are a few interesting Idioms for you to think and use.

1. To cry aim – to encourage
2. To cry off – to retreat or refuse something
3. To cry cupboard – to be hungry
4. To cry quits - agree to stop competing
5. To cry over spilt milk – to spend time in useless regret.
6. To cry up – to praise highly
7. To cry wolf – to raise a false alarm.
8. A task for you, find out the meaning of 'for crying out loud'.

Word Power

Make words using the letters given in the hexagon. See how many words you can make. You may challenge yourself by keeping the central red letter common every time.

Sudoku

Sudoku is a number-based game played on a grid or table having equal number of rows and columns. There may be 4x4 grid, 6 x 6 or 9x 9 grid depending upon level of difficulty. Each row, column and square (4 /6/9 spaces each) needs to be filled out with the numbers without repeating any numbers within the row, column or square. You have to use the numbers given in the table. Each square, row and column should have all numbers.

Presenting here an **easy** one for you to try out.
